THE NEWSWEEKLY FOR PHARMACY

STOP PRESS: PHARMACY ASSISTANT LEARNS LOTS AFTER LIAISON WITH NURSES.

SOME EYES opened at the

Pharmacy Assistants' training programme for 2000.

Of course Night Nurse and Day Nurse care for customers. But with our new training programme, they also care for your career. In three parts, the course is totally free and has been designed to help you provide even better advice to people suffering from colds and flu. For more information, ask your pharmacy manager to call the SB area representative. And let these 'Nurses' make you better.

Night Nurse and Day Nurse are registered trademarks of SmithKline Beecham

How many gingivitis treatments are available in two flavours of mouthwash, a gel and a spray?

One

In cases of gingivitis, only one treatment has all your patients' needs covered. Because only Corsodyl is available as a mouthwash, gel and spray. In a recent survey,* both dentists and pharmacists highlighted Corsodyl Dental Gel's suitability for local use, plus its longer contact time. While Corsodyl Spray was seen as being easy to carry around, easy to use anytime and perfect for localised areas. No wonder that Corsodyl carries the Gold Standard in the treatment of gingivitis.

Think chlorhexidine gluconate. Think **CORSODYL**

Corsodyl Uses: Inhibition of plaque, treatment and prevention of gingivitis, maintenance of oral hygiene, promotion of gingival healing following surgery, useful in the management of aphthous ulceration and oral candidal infection. **Presentation:** Spray and Mint Mouthwash: Clear colourless solution containing 0.2% w/v chlorhexidine gluconate. Mouthwash: Clear pink solution containing 0.2% w/v chlorhexidine gluconate. Dental Gel: Clear colourless gel containing 1% w/v chlorhexidine gluconate. **Dosage and Administration:** Spray: Apply to tooth and gingival surfaces and ulcers using up to 12 actuations of the spray twice daily. Mint Mouthwash and Mouthwash: Rinse mouth with 10ml of the 10ml undiluted for one minute twice daily. Prior to dental surgery, rinse mouth with 10ml for one minute. Dental Gel: Brush the teeth with one inch of gel for one minute, once or twice daily. For oral candidal infection: Apply gel directly to sore areas. For gingivitis use for a week. For ulcers, oral candidal infections, use for 48 hours after clinical resolution. **Contraindications:** Previous hypersensitivity reaction to chlorhexidine. Such reactions are extremely rare. **Precautions:** For oral use only, keep out of the reach of children. **Pregnancy and lactation:** No adverse events have been reported, and no special precautions are recommended. **Side effects:** Occasional irritative skin reactions. Extremely rarely, allergic allergic reactions to chlorhexidine. Superficial desquamation of the tongue, teeth and tooth coloured restoration may occur, usually reversible. Transient taste disturbances and burning sensation of the tongue may occur on initial use of the mouthwash, usually diminishing with continued use. Occasional oral desquamation. Very occasional parotid swelling. **Overdosage:** Systemic effects are unlikely after accidental ingestion or overdosage, however gastric lavage may be advisable. **Product Licence Numbers and Basic NHS Cost:** 'Corsodyl' Spray (0079/0311) 60ml (OP) £4.10 'Corsodyl' Mouthwash (0070/0313) 300ml (OP) £1.93 'Corsodyl' Mint Mouthwash (0079/0312) 300ml (OP) £1.93 600ml (OP) £3.85 'Corsodyl' Dental Gel (0079/0314) 50g (OP) £1.21 Legal Category P Date of last revision June 1998 Licence Holder SmithKline Beecham Consumer Healthcare, Brentford TW8 9BD.

COMMENT

As IT companies seek to become involved in the three electronic prescription pilots - part of the NHS Plan - you wonder how much information the pilots will actually yield on how well independent pharmacists would be able cope. Most pilot test sites are likely to be PCGs and PCTs, so relatively few pharmacies will be involved. Multiples appears to be using their considerable resources to become involved. Boots the Chemists, for example, is believed to have contacted other multiples to launch a joint bid. Some hope for the independents' cause stems from PharMed, the not-for-profit subsidiary of Gehe, which has also put in a bid and has already beta-tested its electronic prescription system with a couple of independents. The Department of Health cannot hope to get a reasonably fair idea of how electronic prescriptions will affect pharmacies unless it ensures independents are involved too. As RPSGB president Christine Glover points out, DoH should not miss the opportunity to see how pharmacies would work under the 'New Era' by including other concepts, such as national service frameworks and guidance from the National Institute of Clinical Excellence, in the pilots. Independents could also face problems over lack of funding. The Government is financing the pilots, but who will pay for the nationwide introduction of electronic prescriptions has not been made clear, despite pleas from the major pharmacy bodies. The Government may be waiting to see which electronic prescription system works best, but that seems unlikely. With a general election looming, the Government is under pressure from many other interest groups, and may feel its financial priorities lie elsewhere. The Government's pharmacy strategy shows it believes in the future of pharmacy - let it prove that commitment by investing in the profession's future. Throw pharmacists a financial lifeline for the biggest technological change they have faced in decades.

October generics shortages

Pharmaceutical Services Negotiating Committee has issued the following statement relating to generics shortages in England and Wales:

"The Department of Health and the National Assembly of Wales have agreed to allow 'NCSO' endorsements for the following items for October prescriptions: clomiphene tablets 50mg; co-triamterzide tablets 50/25; and spironolactone tablets 25mg.

In addition, the following packs are added to Part VIII of the Tariff with effect from October prescriptions:

- chlorpromazine tablets 25mg, 28s, to Category C based on Norton
- indomethacin capsules 50mg, 28s to Category A
- sodium bicarbonate tablets 600mg; to Category C based on Norton.

Oxprenolol tablets 40mg and 80mg, both 100s, move to Category C based on Trasacor with effect from October prescriptions."

- For Scotland, the Scottish Pharmaceutical General Council says the PPD will accept endorsements of manufacturer and pack size for the following products for October: cypoterone acetate 50mg; isoniazid tablets 100mg; and spironolactone tablets 25mg.

Corporate governance in the frame at RPSGB

The interim report on corporate governance, affecting the conduct of Royal Pharmaceutical Society Council members and staff, has been issued.

The contents include the Code of Conduct for Council members, details of how committees should be selected and run, the roles of Council, officers and senior staff members, how Council activity should be monitored and details of the register of members' interests. It does not mention how expenses should be dealt with, an issue raised at recent annual general meetings.

One of its key recommendations is that a Remuneration Committee be established "to ensure fair remuneration, recruitment, retention, rewards and incentives" to allow the Society to attract staff of suitable calibre. This would replace the staff committee and would be responsible for determining the remuneration of the Society's secretary and registrar, directors, editorial director and Welsh and Scottish Executives secretaries.

At last week's Council meeting, the recommendation to establish a remuneration committee was the only one of the 24 proposals in the report that was agreed. Council members were

asked to submit comments on the other 23 proposals, which will then be used to inform the group's final report.

The document says that further work is needed on:

- procedures for Council members to attend meetings overseas
- ways of working/roles and accountabilities of senior staff, including a code of conduct for them
- the Review of the Bank's Report, submitted by Hassan Argomandkhah
- a review of the Code of Conduct to take into account concerns raised by Council members.

The Code of Conduct, which has caused concern among some Council members who have indicated an unwillingness to sign such a document, includes one section intended to deter dissent in public. It says:

"Members of Council should support in public the policies of Council. Where a member of Council feels compelled publicly to oppose a Council policy, the Council should be informed. The member of Council may then express his or her personal views on the matter but must, in so doing, also explain the reasons for the Council's decision, and avoid any action or statement that would undermine confidence in the decision-making process of the Council."

The document has been prepared by the working group on the ways of working, chaired by the vice president Marshall Davies. Its remit has been to provide a framework for corporate governance for the Society and Council "which is transparent and fulfils the requirements for legal, commercial, financial and professional probity and accountability". It incorporates some of the Bank's Report, but adds that all will be looked at again in detail.

Information disclosure

At the same meeting the Council approved a draft framework document on the disclosure of information about its members to parties with a legitimate interest. The mechanism would be used to allow information, in appropriate circumstances and under controlled conditions, to be shared with those responsible for the quality of professional services provided to the public.

Council also agreed that its corporate governance steering group should be asked to examine the issues of the disclosure of confidential information to Council members. This followed a proposal put by Sultan Dajani. He asked: "That in future all members of Council will be privy to all information they so choose, in representing the

membership, of course subject to caveats being that information is passed on in the strictest of confidence, that the information is required during the course of Council duty, and it has been requested in writing."

Mr Dajani had introduced the motion because he had been unable to gain specific information about staff salaries when following up questions put at the AGM. The issue had moved on from there to the issue of Council members being denied information.

Secretary and registrar Ann Lewis said that there might be constraints on giving information in terms of existing policy or the law. There had to be some identification of the need and reasonableness of need for particular duties, not just all information at all times. There had to be recognition of reasonableness in terms of the time spent collecting the information.

Dr Nicola Gray said that many Council members had sympathy for Mr Dajani, but it would be more productive to have robust policies regarding disclosure of information.

The Council elected a group of officers each year and had made great leaps forward in the transparency of that election, said Dr Gray. Council members should trust the officers they had elected, and any Council member asking for sensitive information should be prepared to sign up to the Council's code of conduct before being allowed the information.

Mr Dajani agreed that his motion should be referred to the corporate governance working group.

Look out for this month's Update question paper

Enclosed in this week's issue is the questionnaire for Pharmacy Update modules carried in September:

- type 2 diabetes, part 1 (1175)
- Alzheimer's disease (1176)
- type 2 diabetes, part 2 (1177).

Pharmacy Update is a distance-learning programme accredited by the College of Pharmacy Practice. Previous modules can be obtained by using the faxback service on 0891 444791 (premium rates apply).

Internet users can catch up by accessing the dotpharmacy site (<http://www.dotpharmacy.com>). The Pharmacy Update multiple choice questionnaire and telephone marking service are supported by Genus Pharmaceuticals.

Bill Darling, long-standing Council member and a past president of the Royal Pharmaceutical Society, was presented with a Society keepsake at last week's Council dinner. The presentation was made to Mr Darling for his services to the Conference Committee, on which he has served for a 'considerable' number of years. Pictured are (from left) health minister Lord Hunt, who attended the dinner as guest speaker, president Christine Glover and Mr Darling, the Conference Committee chairman

Pharmacists 'in front line' this winter

Community pharmacists in England, Scotland and Wales are expected to play a major part in the Government's winter planning campaigns this year.

The Scottish Pharmaceutical Federation has welcomed a report from the Scottish Parliament's Health and Community Care Committee recommending a greater public role for pharmacists following the experience of last winter's flu epidemic.

The report's author, Dr Richard Simpson MSP, said recently that "community pharmacists are in the front line on this". He and the Health Committee convener, Margaret Smith MSP, will be writing to the health minister, Susan Deacon, to recommend that pharmacy

staff be included with other NHS staff in any voluntary flu immunisation programme.

Pharmacists have had input into the Scottish Executive's winter advertising, which will encourage the public to seek advice from a pharmacy for colds and flu. The campaign is expected to start next month.

In England, this winter's 'Get the right treatment' campaign focuses on the six treatment options available: self-care, pharmacy, NHS Direct, A&E, GP or 999. Advertising in November and December concentrates on NHS Direct, but in January it will highlight the winter ailments most suited to pharmacist intervention.

The National Pharmaceutical Association is recommending that pharmacy staff seek inclusion in local NHS vaccination programmes.

In Wales a new campaign inside regional buses encourages the uptake of flu vaccination among the over 65s and others at risk.

Norton signs up to PSNC programme

Norton Healthcare has signed up to the Pharmaceutical Services Negotiating Committee's Community Pharmacy Development Programme.

Under the programme, to start in March, the pharmaceutical industry can work with PSNC to help develop and promote community pharmacy at national and local level. APS Berk was the first company to sign up and the exact terms of each company's involvement are still being discussed.

Norton's head of sales and marketing trade, Phil Cockcroft, said: "The Government's commitment to medicines management and other issues raised in the modernisation plans for pharmacy mean it is an exciting time for the profession. Norton is pleased to be working with the PSNC at such an important time."

RPM – timetable for the court hearing

The Community Pharmacy Action Group has issued details of the resale price maintenance court hearing, which starts in earnest on Monday.

It is anticipated that witnesses for CPAG, representing the respondents, will give evidence in the first two weeks.

This includes company suppliers, pharmacy multiples, buying groups and individual pharmacists.

Office of Fair Trading witnesses are expected to start giving evidence from

October 30. The witnesses include Asda, Superdrug, the Consumers' Association, Holland & Barrett and Morrisons.

In early November expert witnesses from both sides will be giving evidence.

There will be a one-week break in the case from November 27, and then in December, both sides will make their closing submissions. It is not expected that the decision will be given until January 2001.

Pharmacy lead players set their sights on e-pilots contracts

PharMed, the not-for-profit group set up by Gehe but which claims cross-industry representation, went to the Department of Health this week to put in a bid to carry out one of the three electronic prescribing pilots announced by Lord Hunt in his 'Pharmacy in the Future' strategy.

Interest in bidding for the three pilot projects is high. Boots the Chemists is understood to have contacted a number of other multiples to discuss putting in a joint bid. The Department of Health is believed to be about to issue a notice warning primary care groups and trusts that they will not be allowed to commit funds to such projects.

The Government's plan to introduce electronic prescribing by 2004 will be fraught with problems, said David Watkinson, director of customer technology at AAH Pharmaceuticals. He was speaking at the National Association of Co-operative Executive Pharmacists Conference in Bromsgrove last weekend (see also pp26-28).

There is some doubt over whether the Prescription Pricing Authority will be ready to participate in the pilots, according to Mr Watkinson.

It is already beginning to look as though England (and probably Wales) will have a different e-prescribing system to Scotland, and Northern Ireland could be different again. This will create problems for organisations that operate across national boundaries, and for patients when they travel to different parts of the UK.

Although the Government will fund the pilot projects it has not yet committed any funding to rolling out the system it eventually adopts, so there is the question of 'who is going to pay?'

Once the model for e-prescribing has been agreed, Mr Watkinson believes implementation will be relatively rapid, although contractors might have to be offered incentives to encourage them to buy into the system.

"What will take the time is the training of pharmacists, dispensers and locums to use the system effectively," he said.

The first bids for pilots have gone in this week; three will be selected, with the last one getting underway toward the end of next year. "My best guess is that the first site will start up in the second quarter of next year," he pre-

dicted. Relatively small numbers of pharmacies will be involved in the pilots, as PCGs or PCTs are likely to be the test sites used.

A window to OTC data

C&D's web site – dotPharmacy – has introduced a service that provides regular data on how well major OTC categories are performing.

Called OTC Window, the section consists of tables and top ten brand lists supplied by Information Resources, a specialist in this field.

The OTC categories will be changed every month – in October we are featuring winter remedies, haircare and condoms. You can access the data on: www.dotpharmacy.co.uk

OTC Window also features a schedule of the categories it will be running over the next 12 months.

Alert on spray batches

Roche Products Ltd is recalling four batches of Coro-Nitro Pump Spray (glyceryl trinitrate) 0.4mg/dose (200 doses) due to reports of sprays failing to deliver a dose upon first use. Affected batches are: GBC090B with expiry March 2002; GBD106A exp April 2002; GBE040A and GBE086A both expiry May 2002. The class 2 recall was issued by the MCA on October 11. Further information is available from Roche Customer Services on 0800 732 5711.

Stability problems prompt recall

Novartis Consumer Health is recalling two batches of Locorten Vioform Eardrops due to stability problems. The batches are L80003, expiry September 2003 and L90004, expiry August 2004. The class 2 recall was issued by the MCA on October 4. Further information is available from Novartis on 01403 218111.

Pharmacists meet Deacon

Representatives of Scottish pharmacy organisations met the health minister Susan Deacon on Tuesday, to discuss the profession's integration into the NHS plan for Scotland. The plan is due to be published on November 30.

Seminars on supplements

There are still places left at seminars being run for pharmacy assistants by the Health Supplements Information Service. The free seminars will be in Glasgow on October 26, Manchester on November 9 and Cardiff on November 30. Topics covered include diet and heart disease, nutrition in pregnancy and supplements in children. Information is available from Melanie Hollister on 020 7761 1716.

Warm and well this winter

The DoH has launched its 'Keep Well, Keep Warm' campaign to help old people cope in winter. Advice on keeping warm, preparing for winter and seeking financial help is available via a helpline or booklets, in 11 different languages, that are being distributed via GPs' surgeries and post offices. There is also a resource pack for pharmacists. Winter warmth advice line: 0800 085 7000, 8am to 8pm Mon-Fri.

Vet medicine licence fees

The Veterinary Medicines Directorate proposes to increase licence fees for veterinary medicinal products by 2.5 per cent to cover inflation. Responses to its consultation in May asked that fees be kept down so as not to reduce the availability of veterinary drugs, as there were concerns about the effect of a fee increase on farmers.

Branch rep motions – six months on

The Royal Pharmaceutical Society Council has again steered clear of pay negotiations in its report on resolutions passed at the branch representatives' meeting in May.

Sefton Branch proposed that the Society "makes approaches to the Department of Health to recognise both financially and formally the advice and care given by community pharmacists". Council's reply is that remuneration is inextricably linked to practice development. "The Society therefore has a legitimate role in working towards a framework for remuneration that will support the pattern and types of services that the public and profession want to see in the future."

But negotiation of the practice allowance, raised at the BRM, is a matter for the Pharmaceutical Services Negotiating Committee, the report says.

Other points raised include:

- Council is to consider, in the near future, a proposal for new fee structures for pharmacy students and newly qualified pharmacists.

- The Society is unable to provide accurate records on members' employment, as this information is not mandatory on the retention fee forms. Consultations are in progress with a view to collecting more meaningful information in 2002.

- Council members have been invited to give comments on canvassing in Council elections. These will be taken into account in preparing a paper for discussion at a future meeting.

- Following a request for an outside consultant to assess the Society's public relations activity, the report says: "An independent audit would no doubt conclude that more PR human resources would allow for more support for the branch public relations officer network. The PR team comprises three people and achieves considerable output for expenditure."

- The cost of publishing, in a national newspaper, the names of successful candidates in the Society's registration exam would be about £5,000.

- In this millennium year, branches wishing to recognise the contribution of an individual member can do so using the current branch budget.

- On October 18 the Society is to discuss with the British Pharmaceutical Students' Association Executive the possibility of a permanent BPSA office at the Society's headquarters.

- Council has decided against a central clearing system for pre-reg graduate posts, in the belief that major employers would not be interested in such a scheme.

Society agrees draft EHC standards

The Royal Pharmaceutical Society Council has agreed to adopt draft standards for the supply of emergency hormonal contraception as a Pharmacy medicine.

It has done so in anticipation of the reclassification of levonorgestrel to Pharmacy medicine status, possibly early next year.

The Council noted at its meeting last week that standards were not required on pharmaceutical grounds since levonorgestrel was considered to be safe, with little risk to users. The standards have been prepared due to the sensitivity of the indications for use and the specific social, moral and ethical issues that were raised by its availability for supply without prescription.

Although Council agreed that pharmacists should personally deal with sales of EHC, it wants training to be extended to other staff. This is because of the need for all to be aware of key issues and recognise that EHC should be referred to the pharmacist early in the consultation.

Pharmacists can also refer to national resources such as the Family Planning Association and manufacturer helplines or web sites.

A sign indicating that EHC is available for purchase is to be supplied to pharmacies. Council also wants pharmacists to consider using a printed

card as an aide-memoire in EHC consultations. Pharmacists will not be required to seek evidence of age, since this was not usual practice before supplying P products. Nor will they be required to treat EHC differently from other P products in regard to record-keeping.

Repeat sales of EHC within the same menstrual cycle should be allowed where appropriate, but pharmacists should not supply EHC to third parties except in exceptional circumstances, it stressed. Council also accepted a recommendation that community

pharmacies should take the lead in establishing links with local family planning services networks. Information on local family planning services (including location, hours of opening and services) should be made available in every pharmacy; and a leaflet containing the list of local services and contact points should be produced so that healthcare professionals could provide consistent information to clients.

The Centre for Pharmacy Postgraduate Education is preparing a distance learning pack.

The following is the agreed text of the standards for the supply of emergency hormonal contraception as a pharmacy medicine:

"Pharmacists in personal control of a pharmacy must ensure that the following standards are observed in the supply of emergency hormonal contraception as a Pharmacy medicine. As with all medicines, pharmacists must have sufficient knowledge of the product to enable them to make an informed decision when requests are made.

(a) Pharmacists must deal with the request personally and decide whether to supply the product or refer the patient to an appropriate healthcare professional.

(b) Pharmacists must ensure that all necessary advice and information is provided to enable the patient to assess whether to use the product.

(c) Requests for emergency hormonal contraception must be handled sensitively with due regard being given to the customer's right to privacy.

(d) Only in exceptional circumstances should pharmacists supply the product to a person other than the patient.

(e) Pharmacists should, whenever possible, take reasonable measures to inform patients of regular methods of contraception, disease prevention and sources of help."

Society seeks greater BPC sponsorship

The Royal Pharmaceutical Society is to seek greater sponsorship for the British Pharmaceutical Conference so that it can be cost neutral or generate profit.

The Society's Conference committee has proposed that potential sponsors will be attracted to themed dis-

ease sponsorship and will support key sessions each day of the conference. The three key areas of next year's conference, 'Global pharmacy – science in the service of patients', will be infectious diseases including AIDS and tuberculosis, coronary heart disease and cancer.

It is anticipated that the programme will be established in outline this month and in major detail by December. Sponsorship raising will start this month.

BPC 2001 will take place at the Scottish Exhibition Conference Centre in Glasgow from September 23-26.

Pharmacy evidence opens a new chapter

The changing role of community pharmacists is considered in a new book published by the Pharmaceutical Press.

'Evidence-based Pharmacy' highlights the services pharmacists are providing and research evidence to demonstrate their benefit. As pharmacy practice is a relatively new academic discipline, the book also provides

pharmacy examples to illustrate health service research methodology.

The author, Dr Christine Bond, is a pharmacist and is deputy head at the Department of General Practice and Primary Care at the University of Aberdeen. She is currently seconded to the Grampian Health Board as a part-time consultant in pharmaceutical public health.

Dr Alison Blenkinsopp and Sheena Macgregor are contributors to the book, which includes chapters on advice-giving in community pharmacy, the reclassification of medicines and health promotion.

The book costs £35 and is available from the Pharmaceutical Press on 01491 829292, or see the web site at: www.pharmpress.com

Scots plan ahead

Pharmacy is reasonably well represented on the new Modernisation Forum of the NHS in Scotland – better, at any rate, than in the similar group announced by Alan Milburn for England. The Royal Pharmaceutical Society, the Guild of Healthcare Pharmacists and Scottish Pharmaceutical General Council all have seats on the newly-formed group, and this will give pharmacy a higher profile than it normally achieves.

The purpose of the Modernisation Forum seems at the moment to provide input for the NHS Plan for Scotland, and in the future to assist in its implementation.

“Health services in Scotland and England may be organised differently in future”

The first meeting of the Forum was on September 13, so the timescale is tight for such an important document. The GHP is responding to an invitation to make a submission to the plan, and so, I assume, is the Society and SPGC.

How much the final document resembles the NHS Plan for England remains to be seen, but since health ministers have been meeting together to compare notes, it is likely to incorporate at least some of the English Plan.

It is doubtful whether the large numbers of extra posts announced in the English Plan will be mirrored in Scotland. Susan Deacon, the health minister, is on record as stating that Scotland starts from a higher base line than England, so many of the promises on increased staff and spending will not be matched north of the border.

It is a consequence of devolution that health services in Scotland and England may be organised differently in the future, reacting to different situations in a way more appropriate for their target populations.

It is to be hoped that whatever the Plan contains, it will also provide the finance to put it into operation. It would be extremely helpful, as a first step, to wipe out the financial deficits facing most of the hospital trusts in Scotland, allowing them to move forward without this Sword of Damocles hanging over their heads.

This act, however unlikely, would significantly improve staff morale and also make them far more positive about modernisation.

Topical Reflections

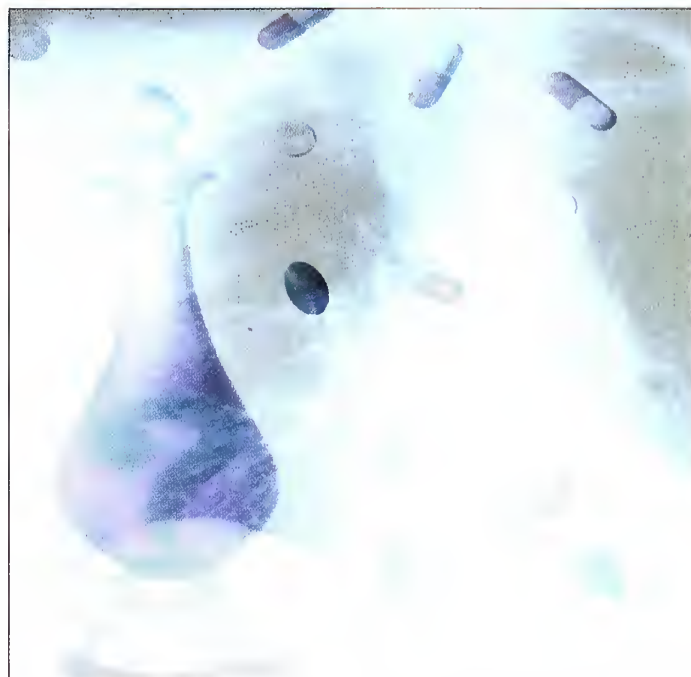

The exuberance of youth is a rare yet splendid thing!

I was called out the other night to dispense an emergency prescription. Not an unusual event, except that it was not a carer who came to the pharmacy, but the attending GP, a young man doing a bit of moonlighting for the local deputising service. I know! He will learn eventually but it was stimulating to witness his concern for the elderly dying man in his brief charge and also to answer his interested questions about pharmacy.

Here was a newly-registered doctor whose knowledge of how pharmacy works was zero. My availability in emergency was no more than he expected but he was amazed that the system relied on the haphazard finding of a suitable volunteer who was then paid a fixed fee no matter how long the call-out took. I explained the problem of a Health Authority that refused to pay for a structured scheme, at which he was even more amazed. I did not totally catch his reply but I think it contained the phrases dark ages and seamless care!

Then the conversation turned to computers as he was impressed by the quality of my computer programme. I explained that this was but a first step since by 2004 his visit will theoretically have been made redundant by the ability of the NISnet to electronically transmit secure prescription information between the two professions. He waxed lyrical about the advantages and opportunities this would provide but stopped short when I explained that so far there was no NHS money for these developments and that pharmacy was expected to fund any developments through competitive advantage.

He left a wiser but disenchanted man who was grateful he was not a community pharmacist. He now understood a little more about my role as a complementary professional but he was not a little surprised that I was still practicing. As he put it: “Thanks for your time, the old man will sleep more easily tonight, but if I was expected to practise like you, you would not see me for dust!”

Great ideas, great plans, but who's going to pay?

Some thought provoking suggestions from Simon Whale, director of Bell Pottinger Public Affairs and parliamentary advisor to PSNC, at the UniChem convention (C&D 7 October, p20). The NHS Plan may provide undreamed of opportunities for developing pharmaceutical services, but the question Simon asks is not whether these services will be provided, but who will provide them and out of whose pocket they will be funded?

Simon highlighted the proposition that community pharmacy does not have a monopoly on the provision of pharmaceutical care. He also indicated that the global sum may not be as sacrosanct as we believe and that it could be split into elements for service and supply provision.

Now I have no problem in changing the emphasis to encourage or even demand service payments, but the global sum is small enough as it is and if it is to be used to fund pharmaceutical care then its whole must still be retained within community pharmacy and the facility for service offered to all. Anything less

will set pharmacist against pharmacist and potentially destroy the community pharmacy network.

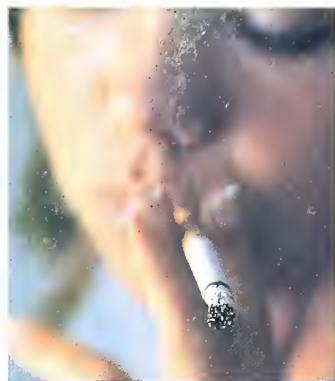

Double the strength, doubly as effective...

Now that Ibuleve Maximum Strength Gel has been launched and will be advertised on TV (C&D 7 October, p11) the days of its 5 per cent predecessor must be numbered. Not only will the public demand the ‘new’ formulation, but the old will become a poor value for money alternative when half the amount of the new gel will achieve the same efficacy as the old and at a pro rata saving of 10p for every gram of the new product used.

The fact that the local Health Authority considers that all topical non-steroidal anti-inflammatories are ineffective will have no influence on the buying decisions of my customers. In fact, it may perversely encourage them to buy after being refused a prescription by their GP.

But if the HA are right then the sales of the low strength are already excellent on the back of a positive placebo effect, so at double the strength it must be doubly as effective!

Pharmacists paid to help smokers stub out the habit

Community pharmacists are to be paid for providing smoking cessation advice as part of a three-stage £175,000 scheme in East Kent.

They are the first group of health professionals to receive additional training to help patients give up smoking. GPs, dentists, health visitors and practice nurses are not due to receive similar training until the New Year.

About 30 pharmacists have attended the first evening training session to encourage them to offer opportunistic smoking cessation advice to patients.

Stage two of the campaign will be three counselling sessions on a one-to-one basis. The pharmacist will receive a £15 consultation fee if the patient attends all three sessions or £5 if they only attend one. This support will be available to patients from the end of November once the pharmacists have undergone a further six hours training.

Smoking cessation workgroups, run over seven weeks, are the third stage of support offered to patients. Group facilitators and participants are being encouraged to make contact with their local pharmacist for further advice and information about using nicotine replacement therapy.

Linda Dodds, pharmaceutical adviser for East Kent Health Authority, said: "I'm really thrilled - this is a huge step forward for pharmacists. This initiative will also show how effective pharmacists are at recruiting patients for this sort of activity which will be useful for future work."

In the workshop stage, those who qualify for free prescriptions will also receive a voucher which they may exchange at any pharmacy for a week's supply of NRT. The health authority will reimburse the pharmacist for the cost of the NRT plus a small handling fee.

The smoking cessation campaign is a joint strategy between East Kent Health Authority and the health promotion unit of East Kent Community NHS trust.

Profession's unified response to 'Pharmacy in the future'

The Royal Pharmaceutical Society's Council has supported a call to ensure that the Society's response to the 'Pharmacy in the Future' document is informed by the views of the other pharmaceutical bodies.

At last week's Council meeting, Hassan Argomandkhah moved that the Society, as the leading body in pharmacy, "will ensure that its response or possible negotiations with the Department of Health are co-ordinated by adequate mechanisms for consultation with all other relevant pharmaceutical bodies in England, Wales and Scotland".

The aim of the motion was to make certain that the whole profession talked to the Department in the same language and with a united front, he said, citing the effectiveness of the Community Pharmacy Action.

Peter Curphey was concerned that the Society represented all pharmacists, whose interests were not the same as those of pharmacy contractors. If this were not recognised, then the Council would be letting down the 28,000 pharmacists who worked within community pharmacy but were not contractors.

Digby Emson said that co-operation was a positive action. Other organisations had resources that the profession as a whole could use to make progress in the time available.

Obituary The Council stood in silent tribute on hearing of the death of Ronnie McMullan, director of pharmaceutical services for Northern Ireland's Central Services Agency and treasurer of the Pharmaceutical Society of Northern Ireland (C&D October 7, p24).

Registration certificates The Council agreed by a narrow majority that in future the signatures of the president, and secretary and registrar, would be electronically reproduced on members' registration certificates.

Pharmacy workforce planning group A pharmacy workforce advisory group is to replace the Council's Manpower Committee.

Byelaw amendments The secretary and registrar reported that the Privy Council had approved an amendment to the Society's Byelaws designed to ensure that timely submission of proposed Byelaw amendments would not be unduly impeded by the timetable for Council meetings.

Welsh Executive The Privy Council has approved an amendment to the Society's Byelaws confirming that the secretary of the Welsh Executive should be resident in Wales and based in the Society's headquarters in Cardiff

and also changing the Welsh version of the name of the executive.

The Pharmaceutical Journal The Council decided that control of the *Pharmaceutical Journal* and its sister publications should continue more or less on existing lines, with the editorial director remaining managerially responsible to the secretary and registrar and editorially responsible direct to the Council. Editorial freedom would continue, within the constraints that applied to any professional publication, and the editor and editorial team would continue to develop the strategic course for the *PJ*. The new editor would be assisted in his or her role by the appointment of an editorial advisory panel, and by the drafting of clear criteria and a code of practice to ensure that advertising and other commercial activities did not affect the *PJ*'s credibility.

Health Act The Society's Health Act working party is to concentrate its immediate efforts on the areas of discipline and competence because of the Government's intention to move forward swiftly with disciplinary reforms for the health professions by Order under the Health Act 1999.

Patient group directions The Society is to develop a resource pack to help pharmacists involved with preparing PGDs or operating within them. The pack is to include standards for pharmacists involved in PGDs, a fact sheet summarising and explaining the legislation, model PGDs for primary and secondary care settings, sample audit tools related to the model PGDs, and suggested areas for PGDs.

Shared pre-reg training The Council has agreed that shared training should be phased in over the three training years from 2001, with a target that all trainees in 2003-04 would have shared training. The Council recognised that not all trainees would experience both sectors of practice in the training years 2001-02 and 2002-03 and made clear that those

unable to get shared experience would not be disadvantaged. The aim was for training providers to arrange a minimum of two weeks in the sector other than the main placement. The Council agreed that it would support the efforts of hospital and community employers to secure additional funding to cover the costs involved in shared training.

Information protection and security Guidance on information protection and security is to be added to 'Medicines, ethics and practice: a guide for pharmacists' and the Society's web site shortly. The guidance suggests that information systems and the data they contain should be afforded protection and vigilance to the same degree as money or Controlled Drugs.

Personal use of computers The Infringements Committee agreed that pharmacy employers should be advised that if they wished to ban employees from using company computers or internet access for personal purposes, then this should be put into their terms and conditions of employment.

NICE to approve Relenza?

Relenza (zanamivir), the anti-flu drug, may be available on the NHS for at-risk patients by the end of the month.

The National Institute for Clinical Excellence is aware of this week's media speculation but says: "We do not intend to comment on this until we have issued our guidance to the NHS and the public."

Last year NICE recommended that zanamivir should not be prescribed on the NHS during the flu season but that the guidance would be reviewed in time for this winter.

At the moment the institute is waiting for a response on its re-appraisal from patient and professional groups and the manufacturer, GlaxoWellcome.

DoH to discuss hospital pharmacists' pay

The Department of Health has finally agreed to meet hospital pharmacists' representatives to discuss the pay claim submitted by them in April.

The meeting, which is due to take place on November 1, will be "an attempt to progress the claim", according to Gerry Looker, section general secretary for the Guild of Healthcare Pharmacists.

This year's claim was for "a substantial increase in pay and other allowances" to try and recruit and retain more pharmacists. The GHP is

interested in establishing whether last year's salary increases, up to 12 per cent for some grades, has had any effect on recruitment so far.

There has not been a uniform interpretation of last year's settlement by trusts, causing problems for pharmacists, and this will also be discussed with the DoH.

The Department's delay in responding to the claim is thought to be due to the extended delay in the Agenda for Change negotiations about the modernisation of NHS pay.

LEMSIP

Many happy returns

At last from Lemsip there is now a new treatment in the children's cold and flu market.

New Lemsip Children's Six+ Cold & Flu Relief is a pleasant tasting, slightly sparkling blackcurrant cold and flu drink

that kids and parents will love.

Backed-up with an extensive national press campaign, this new children's remedy represents a great opportunity; one that can give you all the financial and customer returns you could wish for.

Lemsip and the sword and circle symbol are trademarks

o r d e r s t o c k s n o w f o r b i g p r o f i t s

LEMSIP CHILDREN'S SIX+ COLD & FLU RELIEF ESSENTIAL INFORMATION:

Active Ingredients: Each sachet contains paracetamol Ph Eur 240 mg and phenylephrine hydrochloride Ph Eur 2.5 mg, in a base containing aspartame and mannitol. **Indications:** For the relief of the symptoms of colds and influenza, including the relief of headache and body aches and pains, sore throat, nasal congestion and lowering of temperature. **Dosage Instructions:** Children aged 6 to 12 years: Content of one to two sachets. To be mixed with cold water. Dose may be repeated after 4 hours. Do not exceed four doses in 24 hours. **Contraindications:** Hypersensitivity to paracetamol or phenylephrine or any of the other constituents. Phenylephrine hydrochloride: Juvenile hypertension and cardiac conditions. Do not give to children under 16 years except on medical advice. **Precautions and Warnings:** Care advised in patients with severe renal or severe hepatic

impairment, Raynaud's Phenomenon and diabetes mellitus. The hazard of overdose is greater in those with non-cirrhotic alcoholic liver disease. Do not give with any other paracetamol-containing products. If symptoms persist, consult your doctor. Keep out of the reach of children. If your child is being prescribed medicine by your doctor, seek his advice before giving the product. Immediate medical advice should be sought in the event of an overdose, even if the child seems well, because of the risk of delayed, serious liver damage. Phenylephrine may adversely interact with other sympathomimetics, vasodilators and β -blockers. The speed of absorption of paracetamol may be increased by metoclopramide or domperidone and absorption reduced by cholestyramine. The anti-coagulant effect of warfarin and other coumarins may be enhanced by prolonged regular daily use of paracetamol with increased risk of bleeding; occasional

doses have no significant effect. Due to vasoconstrictive properties of phenylephrine the product should be with caution in patients with pre-eclampsia. The product should be used in pregnancy only if benefits outweigh the risk and on the advice of a doctor. **Side Effects:** Adverse effects of paracetamol are rare, but hypersensitivity including skin rash may occur. There have been a few reports of blood dyscrasias including thrombocytopenia and agranulocytosis, but these were not necessarily causally related to paracetamol. **Phenylephrine hydrochloride:** High blood pressure with headache, vomiting and rarely, palpitations. Also rare reports of allergic reactions. **Retail Price:** Ten sachets £2.59. **Marketing Authorisation:** 0063/01/13. **Supply Classification:** General Sales List. **Holder of Marketing Authorisation:** Reckitt & Colman Products Limited, Watlington Lane, Hull, HU8 7DS. **Date of Preparation:** August 2000

Maxolon SPC reflects changes to licence

Several changes have been made to the licences for Maxolon and Maxolon High Dose.

They are reflected in the current summary of product characteristics and patient information leaflets, and include:

- Maxolon should not be used in patients with phaeochromocytoma as it may induce an acute hypertensive response
- Maxolon should not be administered to patients with gastro-intestinal obstruction, perforation or haemorrhage
- care should be exercised in epileptic patients
- special care should be taken in cases of severe renal or hepatic insufficiency
- metoclopramide... should not be used during lactation.

Copies of the revised SPC are available from the medical information department on 01264 333455. Alternatively, updated copies can be found at emc.rbv.net

Hypertensives are not effectively controlled

Almost half of patients treated for hypertension still have a blood pressure above 140 systolic, according to a survey.

The Blood Pressure Association surveyed 1,500 hypertensives, almost 90 per cent of whom were taking medication for their condition. Over half of those taking medication were experiencing side effects.

The Blood Pressure Association suggested this indicates that a better, more informed dialogue is needed between patients and medical professionals.

Only three-quarters of respondents had made changes to their lifestyle because of their hypertension. The most common change was a reduction in salt intake, followed by exercise and weight loss.

While 80 per cent were treated by their GP, hypertensive patients are increasingly being treated by their practice nurse.

Regurin offers hope of drier times ahead

Galen is launching Regurin (trospium chloride) 20mg tablets for the treatment of detrusor instability or hyper-reflexia with the symptoms of urinary frequency, urgency and urge incontinence.

Trospium's anticholinergic effect exerts a relaxing action on smooth muscle and organ function mediated by muscarinic receptors, including those in the gastrointestinal and genito-urinary tract.

The recommended dosage is one tablet twice daily on an empty stomach, reduced to one daily or one every second day in severe renal impairment.

Regurin should be used with caution in patients with obstructive conditions of the GI tract, obstruction of urinary outflow, autonomic neuropathy, hiatus hernia associated with reflux oesophagitis, and in those for whom fast heart rates are undesirable, such as those with hypothyroidism or coronary artery disease.

It is also not recommended for patients with liver impairment.

Contraindications include urinary retention, narrow-angle glaucoma, tachyarrhythmia, myasthenia gravis, severe ulcerative colitis, toxic megacolon, dialysed renal insufficiency, and children under 12.

No evidence of clinically-relevant interactions was obtained from clinical trials or the spontaneous reporting system. However, possible interactions include potentiation of the effect of anticholinergic drugs, enhancement of the tachycardic action of beta-sympathomimetics, and decrease in efficacy of pro-kinetic agents.

Anticholinergic effects such as dry mouth, dyspepsia and constipation may occur during treatment. Rare side effects include dyspnoea, asthenia and chest pain. The basic NHS price for a pack of 60 tablets is £25.00.

New anti-epileptic drug gets the go-ahead from the EC

A new anti-epileptic agent will be available shortly in this country.

Keppra (levetiracetam) has received marketing authorisation from the European Commission as an adjunctive therapy in the treatment of partial onset seizures, with or without secondary generalisation. The UK, Ireland, Germany and Scandinavia are expected to be the first EU markets to launch

the drug, following on from the US and Switzerland earlier this year.

Pooled results from three randomised controlled trials of patients previously unresponsive to treatment have shown that between 28 and 41 per cent experienced a 50 per cent reduction in seizures. At higher doses, 8 per cent of patients became entirely seizure-free.

The medical and regulatory affairs director at manufacturer UCB Pharma, Gerd Johnschner, said: "Given that the patients [in the trials] had all been previously unresponsive to treatment, the combination of high response and seizure freedom rates, seen together with minimal side effects, confirm that Keppra represents a significant advance in the treatment of epilepsy."

Antipsychotics may increase thromboembolism risk

Conventional antipsychotic drugs have been linked to a significant increase in idiopathic venous thromboembolism.

A study in *The Lancet* linked current antipsychotic exposure to a seven-fold increase in risk of venous thromboembolism. There was a stronger association for low potency antipsychotics such as chlorpromazine and thior-

dazine than for the more potent drugs such as haloperidol. But the study found no difference between the phenothiazines, thioxanthines or other conventional antipsychotic drugs. Risk of thrombosis was highest during the first few months of use.

The study identified 42 individuals suffering from idiopathic venous thromboembolism and 172 matched controls

from a baseline population of almost 30,000 patients under 60 years old who had received the drugs. It compared risk of current and recent use of antipsychotic drugs with non-use before the index date in cases and controls.

The researchers concluded that further studies are needed to compare the risk for conventional antipsychotics to that for atypicals.

Government welcomes all-clear report on fluoride

The Government has welcomed a study in the *British Medical Journal* demonstrating the beneficial effects of water fluoridation.

Health minister, Lord Hunt, said: "The Government will be encouraging health authorities with particular dental problems to consider fluoridating their water as part of their overall health strategy. We will be having further discussions with the water companies and local authorities about water fluoridation." The Government is asking the Medical Research Council

to suggest where it is possible to carry out further research on the subject.

The systematic review searched 25 electronic databases and the internet, and considered articles in relevant journals. Two independent reviewers independently screened resources, extracted data, and assessed validity. The review included 214 studies and concluded that water fluoridation was associated with an increased proportion of children without caries and a reduction in the number of teeth affected by caries.

Fluorosis (mottled teeth) is associated with the concentration of fluoride in drinking water. At a fluoride level of 1ppm, an estimated 12.5 per cent of people would have fluorosis that they would consider an aesthetic problem. There was no clear evidence of other potential adverse effects.

About half a million people in this country receive water that is fluoridated at, or about, the optimum level of 1ppm. Some 5 million people receive water where the fluoride content has been artificially increased to this level.

“With me on TV, you’ll need
to arm yourself.”

You can stand easy this winter. Those Benylin chaps have enlisted me and the boys for a new national TV campaign. Our passing out parade is during Brookside on Channel 4 on 3rd November and the tour of duty lasts throughout the season. So, make sure you stock up on the double.

Benylin. It's going to march out of the door.

Counterpoints

IN BRIEF

Goldshield update

Ceuta Healthcare is now handling the management and development of Goldshield's OTC brands – Kamillosan, Infaderm and Infadrops. All existing ordering and invoicing procedures for the brands will remain unchanged.

Ceuta Healthcare Ltd.
Tel: 01202 780558.

Bring back suspenders

Roche Consumer Health's Cystapurin brand is sponsoring the second annual Cystitis Action Week from November 5-12. The theme of the week is 'Bring back suspenders', as women who wear tights are more likely to suffer from cystitis.

Roche Consumer Health.
Tel: 01707 366000.

New price from SB

SmithKline Beecham is reducing the price of its Niquitin CQ Clear transparent nicotine patch from October 16. The two-week kit will drop in price to £32.95, while the one-week kit will retail at £17.49. The company will be contacting pharmacies to offer compensation for all stock that was purchased at the previous price levels and not sold by October 16.

SmithKline Beecham Consumer Healthcare UK.
Tel: 020 8560 5151.

Where does it hurt?

Crookes Healthcare has produced a Nurofen guide to childhood pain and fever specifically for health professionals. 'Where does it hurt?' reviews the use of ibuprofen in children's ailments and is suitable for pharmacists and their staff. Copies of the booklet are free to pharmacies.

Crookes Healthcare Ltd.

Magic moments for happy families

Warner Lambert Consumer Healthcare is supporting its Calpol children's medicine with a £1.5 million advertising campaign this winter.

The campaign includes national TV advertising this month complemented by advertising in consumer magazines until December 31.

One TV commercial shows scenes from family life with parents talking affectionately, you assume, to their children. However, the last frame reveals that their talk actually relates to the 'magic of Calpol'.

A second commercial features a couple looking lovingly at their photo album – of the Calpol family.
Warner-Lambert Consumer Healthcare.
Tel: 02380 628274.

What about the working glasses?

One Stop Eye Shop is launching a range of reading glasses.

They are available in full or half-frame styles in metal and plastic. Powers range from +1.00 to +3.50.

The glasses are CE-approved and EPOS tagged. Stands can be supplied on request. Retail prices are from £2.99 to £10.99.

Direct Perception Ltd.
Tel: 020 8550 6124.

Colgate's 'Neutralize' offers an air of fresh breath

Colgate-Palmolive is introducing a 24-hour fresh-breath system designed to be used at home and when out and about.

Colgate Neutralize rinse and lozenges contain alpha-ionone, a compound found in tomatoes, and zinc. These convert the volatile sulphur compounds that cause bad breath into odourless sulphide compounds.

The product is inspired by an old folk remedy, which used tomato juice to counteract the smell of skunk spray – a concentrate of sulphurous compounds.

The rinse should be used morning and night. Up to two lozenges a day can be used after meals or whenever breath needs freshening.

POs materials include a merchandising unit, posters, shelf-talkers and patient-information leaflets.

Retail price is £4.99 for the system pack (300ml rinse and 24 lozenges) and £2.49 for the refill lozenge pack.

Colgate-Palmolive UK Ltd.
Tel: 01483 401902.

Wellwoman – Intelligent nutrition for women, recommended by *she* magazine

Every woman ultimately wants to look and feel great. That means taking care of health from the inside, as well as on the outside

Wellwoman® from Vitabiotics is the NEW intelligent supplement designed for the demands of modern life. Each capsule delivers a wide range of nutrients and trace elements to help women maintain their most vibrant looks and total wellbeing.

Removing the need for multiple supplements or unattainable diets, Wellwoman® provides what women really want from a supplement in a simple one-per-day formula. Quite unlike any other general multivitamin, it balances micronutrient levels with rich sources of GLA to support the areas of health which are of most interest to women.

"There are a great number of supplements on the market aimed directly at women, for use at different lifestages or for specific conditions. The beauty of Wellwoman® is that it is a very broad spectrum supplement with the powerful backing of *She* magazine and a totally unique formulation."

Product Details

- 30s pack price £5.95
- Successfully launched June 2000
- Sales well ahead of targets
- Recommended by *She* magazine

Health and Vitality – Capsule Nutrition!

To help women maintain optimal health and vitality, good nutrition is of primary importance, but for many women, their busy lifestyle means they do not have time to cook nutritious meals everyday.

Wellwoman® is recommended by the experienced health and beauty team at *She*, who know Wellwoman®'s unique formula of micronutrients and antioxidants, plus Starflower Oil and Evening Primrose Oil, make it the ideal supplement for busy modern women.

The addition of B vitamins and trace minerals such as zinc may help maintain nail strength and moisture. Other nutrients such as biotin are essential to hair growth and hair follicle formation.

The Monthly Cycle – 'B' in balance with nature

Wellwoman® provides Starflower Oil and Evening Primrose Oil, two of nature's richest sources of GLA (gamma linolenic acid). GLA may help maintain normal breast comfort before a woman's period and is vital for the formation of prostaglandins – hormone-like substances vital for premenstrual health.

Mixed B vitamins are also included, popular with women to help maintain emotional balance throughout the monthly cycle.

The Immune System – Antioxidant defence

The antioxidant vitamins C and E play a crucial role in the immune system, helping to maintain resistance to infection and

immune defence. Bioflavonoids, which help scavenge free radicals and protect free vitamin E from oxidative stress, are also included.

Conception – Thinking about Sex?

Not everything in life is planned! Since it is possible that a woman might become pregnant while taking Wellwoman®, vitamin B12 is provided with folic acid at the precise level recommended for an unborn child, to help protect the baby from the very first moment of conception.

Fully Comprehensive Cover!

Wellwoman® provides an intelligent blend of vitamins and minerals at levels scientifically determined to be optimal for busy, modern women. It replaces complicated routines of individual supplements with a single comprehensive capsule for total well-being.

Robert Taylor, marketing director of Vitabiotics, said:

For further details on Wellwoman® and all other Vitabiotics products, contact Robinson Healthcare Ltd.

VITABIOTICS
WHERE NATURE MEETS SCIENCE

Skin and Hair – Internal cosmetics

Any minor deficiency in dietary nutrients is most likely to show first in the complexion, hair and nails. Wellwoman® contains antioxidant vitamins C, E and beta-carotene to help guard against free radical damage which can cause reddening and wrinkling of the skin, ageing of skin cells, age spots and even DNA damage.

Nightly fix for wrinkles

Vichy is launching Reti-C Concentrate Corrective Night Treatment.

The product contains retinol, for wrinkle repair, and vitamin C. In combination with the Reti-C Day Cream it provides a complete treatment to reduce the signs of ageing.

Reti-C Concentrate is available only from pharmacies and is hypo-allergenic and non-comedogenic.

Retail price is £19.50 for 30ml.

Cosmetique Active UK Ltd.

Tel: 020 8762 1030.

Oilatum Junior Cream is soft on dry skin

Stiefel Laboratories is launching a cream for children and babies with dry, itchy skin conditions.

Oilatum Junior Cream is formulated to soothe, soften and rehydrate the skin, leaving a protective emollient barrier.

The cream is fragrance-free and suitable for eczema. It is packed in a colourful flip-top tube featuring child-like illustrations.

The launch will be supported by a

£500,000 advertising campaign in national newspapers and women's magazines until December and again in February/March 2001.

Sampling activity will include the Oilatum Total Skin Solutions Shopping Centres Roadshows in early 2001.

Retail price is £4.99 for 150g tube.

Stiefel Laboratories.

Tel: 01628 524966.

L'Oréal takes a mature look and gives it just what it needs to glow

L'Oréal is launching three new skincare products for mature skin in its Plenitude range this month.

Plenitude Age-Perfect products are targeted at women aged 55 plus and are formulated to alleviate the dryness of mature skin.

Age Perfect Day (rsp. £8.99) is a light day cream that incorporates a blend of re-hydrating and firming ingredients.

Age Perfect Night (rsp. £9.49) is a

night treatment offering a deep nourishing and ultra firming action.

Age-Perfect Anti-Age Spot Treatment (rsp. £9.49) is a 'clarifying' treatment for face, hands and neck. It includes a lightening complex to help counteract the effects of melanin and reduce the appearance of age spots.

The products incorporate L'Oréal's new Dermo-Peptide technology,

described by the company as an 'anti-ageing' formula.

The launch will be supported by a £2.5 million TV campaign until the end of this month with another burst in February/March.

A special counter unit for pharmacies offers customers £2.00 off the usual retail price of all three products.

● L'Oréal will launch a dual-action cleanser for eyes and lips in its

Plenitude range in January.

Plenitude Gentle Make-up Remover for Eyes and Lips (rsp. £3.99) has been developed to remove waterproof and long-lasting make-up from both eyes and lips.

The product is formulated to leave the skin feeling fresh, soft and revitalised without a greasy residue. It is suitable for sensitive eyes.

L'Oréal Group UK.

Tel: 020 8762 4000.

Who can
treat the

ins

An effective, soothing treatment for
internal thrush infection.

Product Information: Presentation: Canesten® Once Cream containing clotrimazole 10% w/w. Canesten® Thrush Cream contains clotrimazole 2% w/w. **Indications:** Once Treatment of candidal vaginitis. Thrush Cream Treatment of associated candidal vulvitis. Thrush Cream should be used as an adjunct to treatment of candidal vaginitis. **Dosage and Administration Adults:** Once Insert the contents of the filled applicator (5g) intravaginally. **Thrush Cream** Apply to the vulva and surrounding area two or three times daily and rub in gently. **Children:** Once Paediatric usage is not recommended. **Thrush Cream** There is no clinical experience of Canesten Thrush Cream in children. **Contra-indications:** Hypersensitivity to clotrimazole. **Warnings and Precautions:** A physician should be consulted if this is the first time the patient has experienced symptoms of candidal vaginitis or if any of the following are applicable: more than two infections of candidal vaginitis in the last six months; previous history of or exposure to partner with a sexually transmitted disease; pregnancy or suspected pregnancy; aged under 16 or over 60 years; known hypersensitivity to imidazoles or other vaginal antifungal products. Medical advice should be sought

10% and 2% cream treatment for thrush

Now blonde men can have more fun

L'Oréal is launching a new hair-bleaching kit for men in its Ferie Color range.

Blonde Surf joins the three existing shades in the Ferie Color permanent-colorant range for men. It is formulated to provide a bleach-blond result without the hair appearing flat and lifeless.

Designed to be quick and easy to apply, the product comes with L'Oréal's Applicolor dispenser. The pack also includes Professional style gloves plus an AfterColour Conditioner with a UV filter.

The pack depicts a young man in a half body shot, rather than a traditional close-up head picture. Retail price is £6.99.

● The UK market for men's hair colorants is growing faster than the women's market – the number of men using colorants has doubled in the past year.

According to L'Oréal, over 56 per cent of men who purchase hair colorants are currently buying female shades and blonde is a favourite colour.

L'Oréal (UK) Ltd.
Tel: 020 8762 4000.

Step wise skin care

Bio Laboratories is launching a new range of products for the skin and scalp.

The Exmatique range is suitable for dry, itchy, red skin conditions including eczema and dermatitis. All products are enriched with vitamins A and E.

For the scalp there is a Revitalising Hair Conditioner and a Hair and Body shampoo (both rsp £11.95 for 250ml).

The body care range includes Intensive Skin Cream (rsp 100ml £19.95), Liquid Soap (rsp 250ml £8.95), Baby-Soft Bath Oil (rsp 250ml £10.95) and Body Milk (rsp 300ml £14.95).

All Exmatique products are fragrance-free and have not been tested on animals.

Bio Laboratories Ltd.
Tel: 0161 903 9520.

More green bottles for Mitchum

Revlon is introducing two variants for its Mitchum anti-perspirant – Shower Fresh for women and Mountain Air for men.

New 50ml and 100ml big ball roll-ons (rsp £1.85 and £3.19) have also been added to the range.

The products are now packaged in light green bottles for women, dark green bottles for men and mid-green bottles for the unisex variant.

Heinz takes its first steps into organics

Heinz is expanding its babyfood line-up into organic foods for the first time.

An initial range of 12 organic varieties comprises six fruit purees, four vegetable purees and two meals in jars. The foods are suitable for babies from four months.

The Organic Fruit Jar varieties are Apple, Apple and Apricot, Pear and Banana, Peach and Pear, Apple and Blueberry and Mixed Fruits.

The Organic Vegetable Jar range includes Carrots and Sweetcorn, Pea and Parsnip, Garden Vegetables and Carrots, Parsnips and Peas.

The Organic Simple Meal varieties are Vegetables with Beef

and Carrots and Parsnips with Chicken.

Ian Hunt, Farley's & Heinz UK general manager, comments: "We have deliberately kept things simple because that is what parents have told us they want."

"This is the beginning of a new era for the organic market because we're introducing Heinz standards every step of the way from field to fork."

"Our research shows that brand awareness in the organic sector is low. Heinz will drive interest and growth, broadening choice further than ever before."

Retail price is £0.59 for a 125g jar.

POWERFUL CRAVING RELIEF WHEN THEY NEED IT

Newest beauty collections take their cue from the sensual 'animal' look seen at many top fashion designers'

autumn/winter 2000 shows. Animal prints, from zebra to tiger, fake fur and leather dominated the catwalks.

Colours are inspired by wildlife, with a mixture of warm and rich colours to create an exotic effect. The wild, feline look emphasises the eyes which are dark, moody and very striking.

Facial make-up has the largest value share of the total cosmetics market which Mintel predicts will be worth £677 million by the end of 2000. Facial make-up accounted for 36 per cent of value sales in 1999.

Foundations have benefited from new formulations that provide high-performance benefits, yet give a natural look. Many foundations now include sun filters, moisturisers and vitamins. Foundation sticks have increased in popularity in the last two years.

Foundations tend to appeal to older women who use them to even out skin tone and imperfections and, increasingly, to help minimise the signs of ageing.

After years of decline, nail products have shown positive growth due to more adventurous colours and finishes and the advent of quick-drying brands.

Keynote reports that lip products and eye make-up have enjoyed more modest growth than nail varnish. Lipstick is widely used by women of all ages, whereas eye make-up and nail varnish tend to be more popular with younger women.

Eye make-up is another sector where the demand for convenience has been met by easy-to-use pencils and crayons. Consumers expect products to deliver the required effect, but to be quick to apply and long-lasting.

Consumers may not be using more eye make-up, but manufacturers are persuading them to try new products such as the new generation of 'curling' mascara.

What's new

... for the face

● Elizabeth Arden has developed a new foundation to combine light to medium coverage with a natural look. Flawless Finish Bare Perfection Makeup SPF8 (rsp £16.00 for 30ml) contains a vitamin A derivative to help soften lines, even skin tone and promote firmness. It can be teamed with Arden's new Flawless Finish Concealer (rsp £10.00 for 12ml) to

The Beautiful game

Margaret Astor Colour Cosmetics is going wild this autumn/winter with its exotic 'Wild Instinct' limited edition colours

hide dark circles and tiny flaws without a heavy make-up look. The concealer contains vitamins and botanicals to help soothe puffiness.

● Laboratoires Garnier is introducing a new long-lasting, lightweight foundation in its Maybelline range. Non-Stop All Day Wear Make Up (rsp £5.99) contains oil-absorbing and moisturising ingredients for a fresh and flawless finish throughout the day. It is suitable for all skin types and comes in six shades.

● P&G is introducing a new long-

lasting foundation in its Max Factor range. Facefinity Liquid Make-up (rsp £9.95) has been developed with new technology to give a fine, natural finish that lasts all day long. The product is fragrance-free and contains UVA/UVB protection SPF 15. It comes in a range of seven shades.

● Chattem UK is launching new powder papers to eliminate facial shine. Corn Silk Powders (rsp £3.99) are made from a natural walnut formula that absorbs excess facial oil and perspiration. Presented in a

stylish compact with mirror, the powders are suitable for any skin tone from very dark to very light. They can be applied over existing make-up or used on their own.

● L'Oréal is launching a new light-reflecting foundation later this month. L'Oréal Translucide (rsp £8.49) contains micro-powers that reflect light to help the skin appear more radiant. The product has a light, oil-free foundation to provide a shine-free finish. It is available in six shades and has a SPF of 12.

... for eyes

● Mister Mascara is introducing a smaller, capsule version of its department-store range into pharmacies and other health and fashion outlets. The 8 Capsule Collection comprises Twistie Pencil, Slant Tweezer, Classic Lash Mascara, Double Duty Mascara, Retractable Lip Brush, 3 in 1 Sharpener, Eyelash Curler and Lash Comb. An opening package includes a free merchandising unit. The range is distributed by Luxe (tel: 020 7410 1810).

● Laboratoires Garnier is launching a new Maybelline mascara designed to soften and condition lashes. Full N' Soft Mascara (rsp £5.49) is formulated with panthenol and ceramide using haircare conditioning technology. It also contains vitamin E to help smooth and protect lash cuticles.

● Miners Cosmetics is launching new brushed-silver Eye Liner, Clear Lash Mascara encased in a clear, frosted tube, and Define 'n' Line liquid eyeliner in a black tube with a slender brush for precision application.

... for lips

● Revlon is introducing a new luxury range of moisturising lipsticks this month. Deluxe Creme Lipcolor (rsp £7.95) combines rich colour with lip nourishment. The lip colour surrounds a special 'vitamin-filled' moisturising inner core filled with active anti-oxidants vitamins A, C and E. The SPF 15 formulation includes a hint of menthol for moisturising and cooling. The lipsticks come in ten shades presented in a deluxe gold case.

● Jica Beauty Products is introducing

properties and high gloss. The product contains plant oils, lanolin vitamin E and has an SPF of 8. It comes in a curved tube with a foam-tip applicator for precise application. ● Visage International is producing boxes of three lipsticks and a remover for its Ultraglow range. Durakiss Mixers (rsp £19.50) are in three colour combinations - Nudes, Bronzes and Pinks. Packaged in slim pen applicators, the lipsticks come with a moisturising remover formulated to remove all traces of lip colour. Used alone, the remover is suitable as a lip balm.

... for nails

● Richards & Appleby has combined three of its best-selling Nailoid Results treatments in one miniature All-in-1 pack (rsp £5.95). The three products - Manicure Cream, Night-Time Nail Strengthening Mask and Triple Action Nail Builder come in small jars that stack into a tower.

● Manicare will unveil a new range of 'Mood Enhancing' nail treatments in January 2001. The treatments are formulated to aid relaxation whilst caring for the nails. Available in lavender or peppermint, the treatments will include Nourishing Oil, Cuticle Exfoliator, Overnight Treatment and Nail Mask.

● Mavala is introducing a shimmering trio of Mini Colours (rsp £2.99) for nails this Christmas. Myrtille, Rouge Rubis and Or Gold are

Crazy for darker colours

Dark-skinned women often have very little choice of make-up to suit their varying skin tones. However, two new colour cosmetic products especially for darker skins are available this autumn. Sleek Cosmetics (a budget brand aimed at 'women of colour') has introduced Crazy for Colour Natural Cover Foundation (£2.99) in four dark shades and Sheer Lipstick (rsp £1.99) in ten colours.

Sleek has also updated its image with new PoS material featuring three Afro-Caribbean models. Multi-level floor stands and adjustable counter-display units are available.

Advertising support this autumn includes free sachets being given away with black beauty magazines. Prior to Christmas, the company will also be advertising in London on bus shelters and in magazines.

Sleek International Ltd
Tel: 020 8546 9006

the new colours to add glamour to the festive season.

● Collection 2000 is launching a range of metallic nail polishes in November as part of its Gems collection for Christmas. The six metallic colours are Topaz, Amethyst, Zircon, Diamond, 22 Carat and Bronze (rsp £1.49). The range features a total of 17 sparkling shades for festive eye, lips and nails.

Nailoid Results now comes in an All-in-1 pack

a new US lipstick fixative into UK pharmacies. Sealed with a Kiss (rsp £4.95) is a lipstick fixative that is formulated to help prevent lipstick from bleeding into the fine lines around the lips. It features a roll-on applicator and is said by Jica to seal lipstick for up to six hours.

● Coty is launching five new shades of lip gloss in its Rimmel range. Vinyl Lip Gloss (rsp £2.79) is a non-sticky, high-shine lip gloss that is enriched with anti-oxidant vitamin E. The new shades are Snog (pink), Mmmmm! (mauve), Cosmic (brown), Abracadabra (lilac) and Crystal Clear.

● L'Oréal is adding a clear liquid lip gloss in its Rouge Pulp range. Rouge Pulp Clear Gloss (rsp £5.29) is formulated to combine long-lasting

Collection 2000's metallic nail polishes

Girl power!

The cosmetics and toiletries market is burgeoning with products targeted at teenage girls and even-younger 'tweenies' who are becoming big business in the beauty world. Sarah Thackray reports

Girls are being lured into the world of fashion and beauty at an increasingly young age. Influenced by TV programmes,

magazines and pop idols, girls are aspiring to be more grown up from an earlier stage.

Marketters argue that little girls have always loved dressing up, trying on their mother's high heels and smudging lipstick across their faces, so why not let them do it properly?

Child psychologists and parents worry about the potential dangers of

girls imitating adults and becoming more vulnerable because they look older.

The fact is that today's kids have more money to spend than ever before and manufacturers are tapping into this substantial pocket-money power with products aimed at pre-teen girls or tweenies.

Research by Mintel in its Pocket Money report (June 2000) shows that girl power was highly evident in 1999, with girls' income rising by nearly 18 per cent year on year.

Continued on P21 →

→ Continued from P19

Girls are becoming interested in cosmetics at an ever-earlier age and although the number of young girls is set to decline between 1999 and 2003, this age group is important to make-up manufacturers seeking to attract the next generation of cosmetic users (Mintel Make-up Market Intelligence, August 2000).

Mintel believes that the likely brand winners will be those that receive heavy investment in advertising and at PoS or those that are tightly targeted.

Boots, for example, discovered that 'tweenies' like to wear make-up but that existing brands are generally too sophisticated for them.

Boots first market-tested its own-brand Glitter Babes range last Christmas and rolled it out as an all-year-round range in its larger stores in May. This fun range of toiletries, make-up and accessories is aimed at 5-12-year-old girls and prices start at £2.

Boots launched the range with the aim of meeting the wishes of this consumer group and allaying any concerns that mothers might have about their daughters wearing make-up.

From this month, Boots Glitter Babes is sponsoring the TV programme *Sabrina the Teenage Witch*. Based around the six characters that appear on the products, the sponsorship will run until December 29.

Pocket-money prices

Other girls' beauty launches this year have included a pocket-money priced toiletry range called 'That Girl's got Attitude' aimed at 6-16-year-olds.

Manufactured by Gaughan Associates, this range includes body spritzers, edt, bath rocks, bath blitizers, glycerine soaps, body glitter gel and a furry glitter purse containing a soap.

The products come in three fruity scents and two new fragrances - Manic Mandarin and Silly Strawberry - will be introduced in November/December. Brightly coloured floor or counter display units are available to help create impact for the range in pharmacies.

Marcus Needham, sales and marketing co-ordinator for Gaughan Associates, comments: "Today's young girls have more buying power with their pocket money and our products are often an impulse purchase."

"A product is considered to be a bargain if priced at under £1 and the most popular product in our range is body spray which retails at £0.79."

Another growing 'tweenie' range is the Baylis & Harding Gotcha Girls toiletries collection. Latest additions to this range are fruity body spritz fragrances and peel-off face masks with names like Curly Cherry, Gotcha Grape and Luey Lemon.

'Tweenies' love to experiment with cosmetics, but need something more playful than brands aimed at adult women

New, too, are four Gotcha Girls gift bags (including a fluffy-topped version) packed with girly goodies, from fun hair clips to glitter bubble bath.

The Spectacular Cosmetics range also targets young girls with prices starting at £1.00 for a mini eye pencil, mini lip crayon or a face sparkler. Letheric recently acquired the worldwide rights to manufacture and market this brand, which is now distributed in the UK by Designer Distribution.

In a new venture, the company has recently introduced a cosmetics vending machine into some Topshop fashion stores. The zany 'Make Up To Go' machine holds 51 Spectacular Cosmetics products for eyes, lips and nails.

A range of Spectacular Cosmetics Christmas gift sets with teen appeal includes mobile-phone holders in pink, blue or purple containing roll-on body glitter and glitter nail polish in matching shades.

Miners Cosmetics' new gift sets have also been designed with younger consumers in mind. Face Odyssey 2001 is a collection of iridescent, space-inspired gifts including 'Wanna

go Disco' (dazzling disco products) and beaded zipper bags, drawstring bags and bits'n'pieces pouches - all containing a selection of shimmering cosmetics.

Earlier this year, Coty introduced Miss Sporty into the UK through independent pharmacies and Superdrug stores. This uncomplicated cosmetics brand is designed to appeal to the young teen market (12-16 years).

Miss Sporty is fun, colourful and affordable with just 16 items and three price points - £1.29, £1.49 and £1.99. Every item in the new Miss Sporty 'Party Shades' cosmetics collection for Christmas retails at £1.29.

Experimental stage

Teenagers tend to be the most experimental age group as well as being prone to impulse purchasing. Mintel's Make-up Market Intelligence report points out that teenage use of eye make-up and nail varnish is especially high, suggesting that they like to wear colour cosmetics to make themselves look more attractive and confident.

Teenagers are unafraid of using unusual and striking colours in order

For the first time, a new £250,000 advertising drive for Lipcote transparent lipstick sealant targets the growing 'tweenie' market via teen magazines this autumn

to create an impression among their peer group or opposite sex.

The youth market tends to be the prime target for cosmetic brands as these consumers are usually more experimental in their choice of brands, products and shades. They also tend to be heavy users - making them a highly lucrative sector.

Girls aged 15-19 are more likely to say that colour is most important, reinforcing the message that young girls like to experiment with outlandish colours and textures, such as blue and green glittery nail polish.

Teenagers are by far the most likely to try out new products and it is the young who are currently the target of many new brand launches.

Although they enjoy experimenting with new products, teenagers are unlikely to become loyal users so teenage orientated brands must constantly innovate to maintain appeal among fickle customers.

"Teenagers are looking for innovation as a means to express themselves, to defy convention," says David Allen, marketing director at Coty.

He adds: "As well as growing up quicker than ever before, teenagers are becoming increasingly discerning. They want choice in everything so that means they require a portfolio of fragrances, cosmetics and toiletries to choose from depending on mood and occasion."

"They also have more disposable income than ever before and are now driving the category for signature and designer ranges."

Capitalise on Calpol

Calpol outsells its competitors by 5:1 and should be well represented on the back wall

After more than 30 years as the leading children's analgesic, Calpol remains the nations' favourite children's medicine. Calpol was first introduced into pharmacy in 1966 and, since then, has secured a place in parents' hearts.

The Calpol family has held a 'magic' appeal for over three generations of parents, who have trusted the brand to help relieve their children's pain and fever. However, the brand has refused to stand still and, since its launch in the 60s, the Calpol range has grown to meet the needs of today's parents, many of whom lead busy, working lives.

To ensure that the brand appeals to today's consumers, the range has undergone a makeover. Calpol's packaging has been given an image boost, adding a vibrant new colour to the design – pink.

However, consumers will still recognise the trademark purple that they have come to know and trust. The packs will have great shelf presence and consumer appeal both behind the counter and on self-selection.

Baby business boomer

The paediatric analgesic market is currently worth £34.8 million – with Calpol holding a 65 per cent share. At the same time, Calpol has helped to

drive total market growth of 14.6 per cent year on year.

In-store opportunities

To coincide with Calpol's new image, Warner-Lambert has produced a range of innovative new planograms to help pharmacists achieve maximum impact and increase sales – regardless of the fixture size.

The paediatric analgesic category is the second biggest category in pharmacy (source IMS Dataview MAT '99). The total general pain relief category in store, including adult brands, accounts for 23.8 per cent share of sales and, of this, Calpol accounts for 16.8 per cent.

With a 65 per cent share and

Giving mums a helping hand

The Calpol family provides a range of literature to give support and information to parents on pain and fever relief, common childhood ailments and immunisation. Calpol's newly designed leaflets can be stocked at point of sale.

To receive free copies of these leaflets call the Warner-Lambert Advisory Bureau on tel: 02380 628 274.

You can also refer worried parents to the Calpol Careline on tel: 020 7616 0664 which offers out of hours advice on how to cope with childhood pain and fever.

Calpol magic helps maximise impulse purchases on the self-selection fixture

excellent cash rate of sale, Calpol actually outsells the nearest competitor by 5:1. Therefore, Calpol should be allocated space on the back wall in line with its market share.

Equally as important, Calpol should be well stocked on shelf to avoid out of stocks and improve visibility.

Calpol Sachets should be merchandised on the baby fixture, in a self-selection area, preferably at the front of store. This position will allow pharmacists to capitalise on both pregnant women and mothers who regularly browse the baby fixture often making impulse buys or emergency purchases.

May/June 2000

Heaven scent?

As pharmacies prepare for the busiest time of year for fragrance retailing, **Sarah Thackray** looks at the effects of discounting

Doubts about the wisdom of fragrance discounting have mainly been based on the damage it can do to a brand image and the 'magic' of a perfume.

Nevertheless, the spread of discounting has made fine fragrance more accessible to a wider audience and has squeezed the market for lower-priced mass brands.

Consumers are now aware that fragrance prices are often higher in the UK than in other countries. Stores like Superdrug and Asda first brought this to the public's attention by selling discounted designer brands sourced on the 'grey' market (imported from outside the EU from authorised dealers but without the permission of the manufacturers).

Newer entrants to fragrance retailing, including discount perfume shops and on-line retailers, are all eager to offer products at prices lower than the manufacturer's recommended retail prices.

The abolition of the duty-free concession for travel within the EU has had a drastic effect on sales of top perfume brands, according to the Cosmetics & Fragrances Report 2000 by Key Note.

The fine fragrance industry is reported to be shocked at the extent and speed at which the demise of EU duty-free shopping has affected sales.

Chemists are popular

The good news is that High-Street retailers of fragrances may have benefited as a result of the duty-free changes.

Despite growing competition from discount retailers like The Perfume Shop and grocery multiples, pharmacies and drugstores are by far the most popular places to buy women's fragrance according to recent research ('Fragrances Retailing' report by Mintel, July 2000).

Coty's new-look Adidas Woman Sport range includes a new Energy fragrance

Ginger Lily Sensations is the newest addition to Coty's Healing Garden range of holistic aromatherapy-based fragrances

In this survey, 29 per cent of respondents say they use pharmacies and drugstores for women's fragrances. Boots tops the list in both men's and women's markets with a 31 per cent share.

While Superdrug is surviving the spread of discounting, its attempts to move upmarket have not fully succeeded and it lags behind Boots in the retailing of fragrances.

Lloydspharmacy is now aggressively promoting discounted fine fragrances in its stores and although fragrance previously only made up a tiny proportion of Moss Pharmacy's sales, it is now a stronger feature of the group's new health and beauty stores.

Mintel reports that the role of fragrance retailing has diminished in smaller pharmacies which are unable to match the multiples in terms of buying power without the might of large company behind them.

It is department stores that have borne the brunt of discounting activity in the market, with their share slipping to 31 per cent.

Mintel research shows that supermarkets are not expected to gain market share and are not generally felt to be an appropriate environment for selling fragrances.

However, the self-service approach to shopping for fragrances appears to be preferable to consumers, with only 8 per cent saying that they liked to be served by a consultant.

A quarter of people make repeat purchases of fragrances and therefore do not need advice before buying. Only 6 per cent of respondents in the Mintel survey were interested in buying fragrances on-line and these would probably be repeat purchasers.

Despite the many mid-market products available, the fragrance market is still dominated by the prestigious classic and designer

brands which have the ability to command higher prices. Due to their suitability as gifts, fine fragrances account for the majority of sales of women's fragrances.

Effects of discounting

Competitive pricing of fine fragrance has eroded the market share of mass-fragrances, which face competition at the other end of the market from body sprays.

Mintel reports that fine fragrance accounted for 72 per cent of sales in value in 1999 with value sales growing by almost 18 per cent between 1994 and 1999.

In contrast, value sales of mass fragrances fell by 1 per cent. Men's mass market fragrances performed slightly better than women's in recent years, but sales were static in both segments in 1999.

Discounting has narrowed the gap between mass and fine fragrances. Consumers aged 15-24, once the main market for mass fragrances, have been able to trade up to fine fragrances.

Designer-brand values are far more important to 15-19 and 20-24-year-olds than other age groups. Early teen and pre-teen groups are attracted by body-spray variants of mass brands which are designed as cheaper alternatives to fragrances.

The popularity of fragrances is very much determined by fashion. Although the classic Chanel No 5 still retains its No 1 position as the UK's best-selling fragrance, the current trend is towards light, citrus scents.

Fragrance wearers are often loyal, with only 13 per cent actively seeking out new brands. Some 33 per cent of respondents in Mintel's research tend to use a particular brand of perfume or aftershave. Only 17 per cent buy a variety of fragrances.

According to Mintel, customers of chemists and drugstores other than Boots and Superdrug have the highest propensity to wear the same brand and the lowest interest in designer brands, suggesting a 'traditionalist' tendency to go to their local chemist to buy their favourite brands.

The lifecycle of fragrance brands is now shorter as perfume houses and brand owners launch more new fragrances to try to boost consumer interest. Mintel believes that only brands that are well-supported by advertising and marketing are likely to survive.

Looking ahead, Mintel predicts the likelihood of a new market for custom-made or limited edition scents in an attempt to regain the exclusivity eroded by price discounting. However, today's consumers are now more price-conscious about fragrance purchases and that is unlikely to change.

Mawdsley Brooks, the independent wholesaler based in the North of England, is aspiring to become the fourth national player in the UK. **Nina Keller-Henman** went to the company's Salford headquarters to find out what makes Mawdsleys bosses so confident it can take on the likes of AAH and UniChem

Mawdsleys: hungry for power

Bigger and better in terms of geographical area, sales volume and services is the vision Ian Brownlee, Mawdsleys' managing director, has for the UK's largest independent wholesaler over the next 12 months.

Expansion ideas

Expansion into IT and offering a next-day delivery service are only two of the ideas Mr Brownlee mentioned when *C&D* recently visited the company's headquarters in Salford. And a fourth depot in the London area is definitely on the cards for next year.

The goal both Mr Brownlee and his commercial director Robert Harwood have for the company at the start of a new millennium is to be a truly national independent wholesaler by extending the company's business geographically.

Roughly speaking Mawdsleys' current catchment area is Harrogate to the North-East, Lancaster in the North-West and Cheltenham in the South.

In light of an ever-decreasing number of independent pharmacies, Mawdsleys' core customer-base, Mr Brownlee's optimism might come as a surprise, but Mr Harwood said the positive outlook was justified.

Closing the sales gap

"We are definitely making ground in terms of taking business away from the nationals," said Mr Harwood.

In the past three years, he has seen the business grow from a turnover of £93m to £125m today. He puts the company's apparent success down to aggressive marketing, an expanding sales team and excellent customer service.

"Face to face contact is absolutely

"Face to face contact is absolutely vital and we do see our sales team as the driving force"

Mawdsleys' automated warehouse in Salford is designed to allow a rapid response to last-minute orders and to ease changes to existing orders

vital and we do see our sales team as the driving force. Unlike AAH and UniChem, we have actually increased our sales force," he said.

The current sales team has ten business development managers, one for every 75 of Mawdsleys customers. The company's biggest client to date is United Norwest Co-op with its 140 pharmacies. The independent wholesaler's 750 customers are supplied currently from three warehouses in Salford, West Bromwich and Sheffield.

Accessibility and flexibility are, in Mr Harwood's view, the key advantages Mawdsleys has over its competitors. He gives the semi-automated set-up in the Salford warehouse as one example that allows warehouse staff to respond quickly to last-minute orders or changes in an existing order.

He also pointed to other services which Mawdsleys can provide for its customers and admits that the company is not very good at shouting about them.

One such service offered by the

company is the finance guarantee scheme, under which Mawdsleys will guarantee 100 per cent of the loan and offer the pharmacist help with a business plan, with finding a property and also with liaising with the banks. Mr Harwood pointed out that, unlike AAH and UniChem, Mawdsleys does not attach any conditions to the loan, such as insisting on a certain percentage of ethical spend.

Mawdsleys' retail development team, led by Tony Gentle, is in ever greater demand, offering refit and

Managing director, Ian Brownlee

merchandising support at the moderate rate of £99 per day.

No plans for own chain

Despite the threat of a shrinkage in the independent pharmacy sector, Mawdsleys has made the conscious decision not to own its own chain of retail pharmacies.

"We have got a plan, and retail pharmacy is certainly not in it. There is very little choice and the prices they are asking are absolutely silly at the moment," Mr Harwood explained. While, in Mawdsleys'

experience, pharmacists don't seem particularly bothered by a wholesaler owning retail pharmacies, Mr Brownlee said: "I still do not understand why independent pharmacists go to one of the nationals - they might end up buying your shop, or the shop down the road."

As ever, though, there is the exception that proves the rule. In January 1999 Mawdsleys bought its first and so far only pharmacy - Dykes Hall Pharmacy in Sheffield - in order

Robert Harwood, Mawdsleys' commercial director

to prevent it from being taken over by one of the multiples.

"If pharmacies came up for sale and there was a danger of them going out of the independent sector we would buy them, turn them around and sell them back to independents," Mr Harwood said.

Marginal difficulties

Mr Brownlee did, however, issue a stern warning to pharmacists. He is very sympathetic to the pharmacists' aim to beat the Government in the battle over discounts, but is adamant that the level of discount cannot be maintained, let alone be stretched any further.

"What they need to be aware of is that all wholesalers deeply regret the level of discount - the industry works on very tight margins."

Mawdsleys' figures show that the company operates on margins only slightly above the Government's clawback rate. Margins on ethicals and generics are around 12.5 per cent, with OTC margins being even tighter (9-10 per cent).

"The generics side has been battered down by the Government, and that's what has been supporting the discounts," Mr Brownlee added.

Meanwhile, Mr Harwood is convinced that sooner or later something will have to give.

"If pharmacists keep driving for higher and higher discounts

wholesalers might have to reduce services," he said.

Seeking new markets

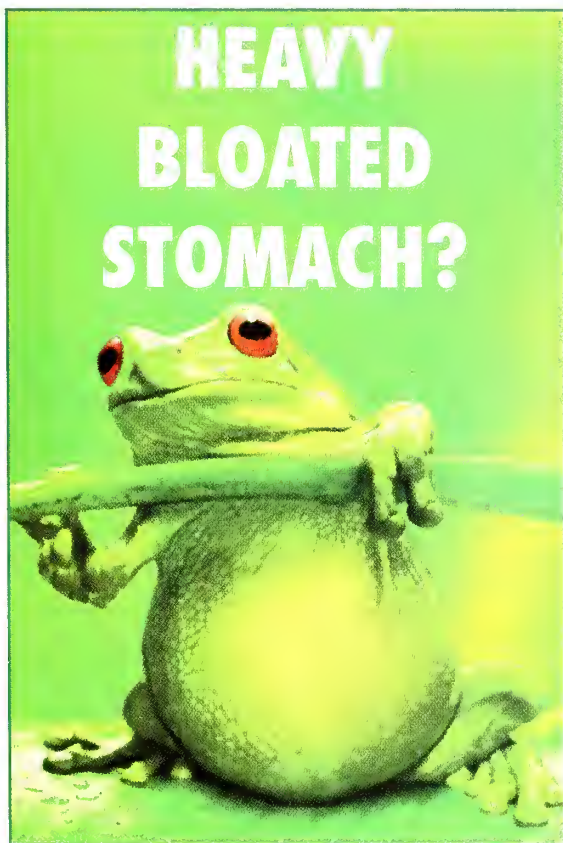

These days a company has to increase its business just to stand still. Mr Brownlee said that the company would increasingly look towards other areas to increase revenue, particularly hospitals, dispensing doctors and export.

Mawdsleys' hospital business, which the company embarked on around 18 months ago, is now worth £10m and accounts for around 8 per cent of Mawdsleys business. The company has got contracts with hospitals in the North-East, the North-West, Yorkshire and Oxfordshire and has just tendered for a new contract in the North Thames Region. However, Mr Harwood points out that the hospital business is operating under very tight margins of around 1.5 per cent in pre-tax profits.

"We certainly see Mawdsleys as being less reliant on retail pharmacy in the future. We won't be reducing our involvement in retail pharmacy. It is still a core sector, but we will build up other areas," Mr Brownlee said.

In fact all the signs are that this is already happening to a certain extent. When Mr Brownlee took up his position at the head of Mawdsleys, 100 per cent of the company's

Motilium 10 is indicated for non-organic indigestion, bloating, flatulence, heartburn, nausea and vomiting after eating.

business was tied to independent retail pharmacists. Currently the figure is around 85 per cent and Mawdsleys aim is to bring it down to 50 per cent.

Getting into IT

IT is one of the areas which Mawdsleys has plans to expand, and the recent acquisition of Positive Solutions is a major step in that direction.

"We know how important IT is and Positive Solutions' knowledge, combined with ours, is a force to be reckoned with," said Mr Harwood.

There are, however, no immediate plans to develop a company web site for on-line ordering, although a web site providing

company information aimed at export clients is a definite possibility.

Mr Brownlee is convinced that IT does have the scope to improve the visibility of the drug chain and that electronic transfer of prescriptions is important.

As far as on-line pharmacies are concerned, he is more sceptical and does not believe that dispensing prescriptions via on-line pharmacies is a viable alternative to the 'bricks and mortar' variety.

"The legal issues are too great, it is too complicated, too difficult and simply not enough money in it," he said.

Scoring an own-goal?

Mr Brownlee is quite clear on what he thinks of the latest Government decisions, such as the demise of category D and the introduction of a maximum tariff for generics.

"What the Government has unwittingly done is to take the profit out of the industry and by

doing so take the service out of pharmacy."

He feels strongly that the Government has scored an own goal as far as generics are concerned, as the new regulations will, in his opinion, not leave any unbranded generics to speak of.

"There really is no incentive for us to deal in generics and we much prefer to deal in branded. You have to give enough money to manufacturers and the supply chain," he said.

Awaiting RPM result

Like most professionals in the pharmaceutical field, Mr Brownlee is eagerly awaiting the outcome of the Resale Price Maintenance case, which will open before the Restrictive

Practices Court on October 16. He won't venture a prediction of its outcome but said that the effect if RPM goes is very hard to determine beforehand.

While he accepted that it would be the smaller pharmacies that would be hit the

hardest, he also feels pharmacists have had ample warning.

Mr Brownlee said that there would be a lot pharmacists could do to offset the effect of losing RPM. They could, for instance, extend the product ranges and expand into homoeopathic remedies and surgicals.

"There will be no shortage of possibilities for the enterprising pharmacist," he said.

As for Mawdsleys, Mr Brownlee wants it to be seen as a "small big company rather than a big small company". He is confident that it is more than ready to take on the nationals.

"Not only do we compete with them, we actually exceed them," he concluded.

"The effect if Resale Price Maintenance goes is very hard to determine beforehand"

The potential impact of the Government's 'Pharmacy in the Future' strategy document dominated events at the National Association of Co-operative Executive Pharmacists at Bromsgrove last weekend

Now is a time to be looking forward, said NACEP president John Nuttall. The Government has thrown down the gauntlet after three years of waiting. 'Pharmacy in the Future' contains not just a framework, but a commitment, to which pharmacists must respond positively. "Unless we embrace change it will be forced upon us," he warned

Push or pull?

There are two basic models for electronic transfer of prescriptions, according to David Watkinson, director of customer technology at AAH Pharmaceuticals.

He described these as the 'push' and the 'pull' models (see box). There are pros and cons for each model, and problems common to both. For both models there must be a standard way for pharmacists to identify patients.

In the 'push' model there would be a need to be acceptance of digital signatures and a means of validating them. In some situations, such as health centre pharmacies, there may be instances where the patient reaches the dispensing point before the e-script.

Paper alternatives, probably utilising

two-dimensional bar codes, might still be needed if the patients want to go somewhere other than their registered pharmacy for the prescription.

The 'push' model would give pharmacists the ability to schedule their repeat dispensing workload. It could lead to different payment systems since the PPA would be able to cost scripts before a claim was made for them.

There is no need for pharmacy registration in the 'pull' model, which would revolve around a central server which would act as a repository for everything that takes place until the relevant item is called down by the pharmacist, GP or Pricing Authority.

"The PPA would like to argue that it should be the central server. Others

The 'push' model

1. The patient registers with the pharmacy of his or her choice
2. Pharmacy informs GP practice that patient has registered
3. GP practice confirms registration
4. When required a script is sent (e-mailed?) to the pharmacy
5. Pharmacy feeds back to GP practice - that the script has been collected or that a repeat needs to be issued, for example
6. At the same time a script is sent to the pharmacy a 'golden script' is sent to the Pricing Authority. The PPA can cost that script in advance and when the pharmacy submits a claim a simple matching process will generate a payment

The 'pull' model

1. GP issues script in response to patient visit or repeat request
2. The script is sent to a central repository/server
3. Patient visits pharmacy of his or her choice and the script is pulled down from the central server for dispensing
4. Pharmacy submits script for pricing and Pricing Authority pulls down 'golden script' to verify GP has issued it

Mawdsleys' fleet competes with the nationals

David Watkinson

feel that this might not be the best solution, and the Government is looking for a third party," said Mr Watkinson.

The 'pull' model does not allow a pharmacist to anticipate a request for a script, but must await a patient prompt. And since the whole process relies on a central server, there would need to be a high level of redundancy in the system to prevent it coming to a halt if the server crashed.

However, this model is particularly attractive to e-pharmacy operators. They could not easily register patients, but they could access the server on behalf of patients, said Mr Watkinson.

More than one

For a long time pharmacists have assumed that a single PC is sufficient for their needs. But for pharmacies

Cost of the average script breaks £10 barrier

The average value of an NHS prescription has broken the £10 barrier for the first time, according to the latest prescription statistics from the Pharmaceutical Services Negotiating Committee.

But gross profit on NHS dispensing for community pharmacists in England and Wales has fallen again from 14.2 per cent in 1998-99 to 13.6 per cent in 1999-00.

The figures, for the period October 1999 to March 2000, show that prescription volume was up 3.4 per cent against a forecast of 3 per cent and that drug expenditure was 13.6 per cent higher compared to the prior year at £5.25 million.

The global sum for the current dealing with more than 12,000 items a year, and where the computer is now used for other things, a networked system in the shop is inevitable.

The changes e-prescribing will bring to pharmacy operating practices "are almost too difficult to call", said Mr Watkinson, "but pharmacists are going to have to be very 'cute' how they go about it".

financial year has been agreed at £777.75m, with the increase in script volume forecast at 3 per cent. However, based on figures to the end of August, script numbers are up 5 per cent, according to PSNC's financial executive, Godfrey Horridge.

This will not leave much scope for any increase in the dispensing fee or the professional allowance this year, he warned, and the percentage gross profit will continue to fall. Proposals on how the global sum will be divided are to be put to PSNC on November 8.

Contractors who want to claim top-up payments for the 1999-00 professional allowance need to do so by October 31, said Mr Horridge.

And he announced that agreement

In planning for a future with IT, he urged pharmacists to consider:

- Staff training
- Shop design to accommodate computers and their wiring
- Budgeting properly for IT - and remembering the need to generate audit trails
- Choosing IT partners on a strategic rather than a tactical basis.

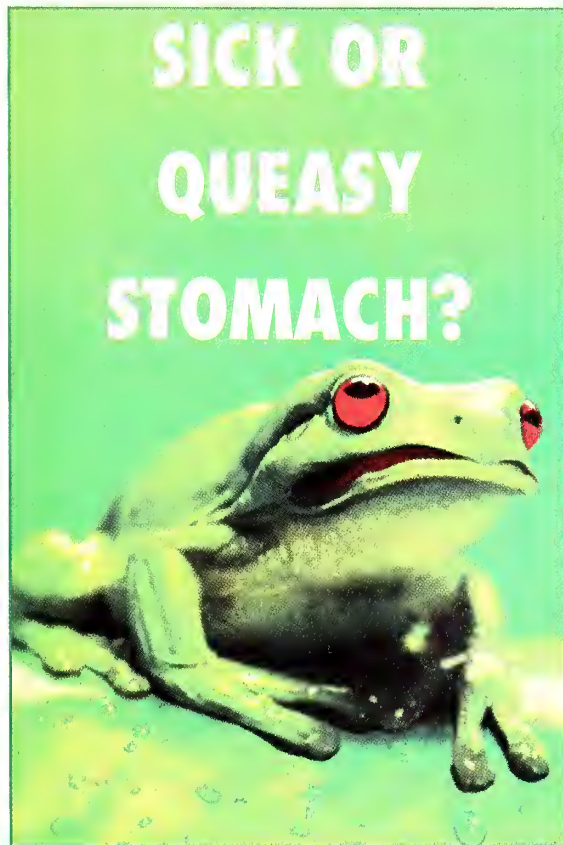

has just been reached with the DoH on a compensation scheme for new pharmacies that have opened in the past two years, covering refund of the discount surcharge which was levied until the end of March.

The 100 per cent advance payments which contractors currently receive will reduce in November to reflect the fall in generic prices. This will probably work its way through the system in about three months.

The discount clawback target for April to September is set at 11 per cent. A delayed discount inquiry will take place this month, with the outcome known by March 2001. The new rate will be backdated to October 1, said Mr Horridge.

There has been a reduction in generic discounts, but other elements have not increased, he said, but he would not predict how it will balance out.

The statutory scheme for generic pricing which came into effect from August 3 has dampened price volatility. Comparing prices against the October Drug Tariff suggests around 20 per cent of generics are priced at the maximum permissible, he said, while a further 40 per cent are within 3p. Others are priced at up to 10 per cent below the maximum permissible price.

Pilots' prescriptions are not enough

The e-prescribing pilots that the government is committed to are not comprehensive enough, according to Royal Pharmaceutical Society president Christine Glover.

It is important that the pilots support concepts like audit, along with the national service frameworks and guidance from the National Institute of Clinical Excellence, she told the NACEP conference. "But I do not think the proposals which are going out to tender are going to meet those requirements."

Describing the 'Pharmacy in the Future' document as "the most positive thing we have had from government in a long time," the president said it faced pharmacists with "enormous challenges, but huge potential if we get it right".

The potential threat from one-stop primary care centres should not be underestimated. "I would like to think the pharmacy input might be from local consortia," she said, adding she had made "strong representations" to the health minister on the subject. She has highlighted the situation in Cheltenham, where a 'super health centre' with 20-plus GPs is threatening to close down pharmacies all over the town.

Other consequences of the government's strategy will see an overhaul of the Society's disciplinary procedures and moves towards revalidation.

A new disciplinary framework will be in place by next summer, said Mrs Glover, "and not before time. It is not that we have wanted to hold back, but we have had little help from the DoH". Outside pressure means it will only be a short time before the

Society will have to move on revalidation.

Asked whether she saw the 'supervision laws' changing, she said: "Yes. We need to get the skill mix debate sorted out, and then we will have to get into the whole supervision issue."

Mark Todd, the MP for South Derbyshire and a member of the All Party Pharmacy Group, said the Government's pharmacy strategy placed pharmacists in a competitive political environment.

Choices made by health authorities and primary care groups and trusts will be critical to how businesses develop, and pressing the correct political buttons will be more important than it has been up to now. "It is worrying that there is no formal framework for pharmacy involvement in PCG/Ts. They both can operate as 'GP clubs'," he said. But Mr Todd did not hold out much hope for additional funding. Cosh is likely to be taken from squeezing some services to prioritise those areas that the government wishes to support, he predicted.

Government dispenses a repeat script

Repeat dispensing is the "good news/bad news" element of the Government's pharmacy strategy. The good news is that repeat dispensing will devolve to pharmacy. The bad news is that there could be an electronic option, said PSNC secretary Steve Axon.

"As 70 per cent of scripts are repeats, competition to dispense these will be extremely fierce," he said last weekend at the NACEP conference. "It will be for community pharmacy to show the added value that it can provide."

Whether repeats are written or electronic, the fact that 80 per cent of patients use the same pharmacy is still one of the greatest strengths that community pharmacy possesses.

The greatest driver for change in the strategy document is the introduction of local pharmaceutical services, he believes. The Government expects a third of GPs to be in PMS schemes by 2002 and more than half to have made the switch by 2004. PSNC's equivalent body - the GPC - is now looking at

ways of becoming involved in negotiating on behalf of PMS GPs.

From a practical standpoint it is clearly the intention that contractors will continue to be the main service providers, working in collaboration with health authorities and PCTs, he said.

"There would be a conflict of interest if a PCT had any regulatory interest in the pharmacy contract. This scenario also makes it totally inappropriate for an HA to delegate any function relating to the administration of pharmacy contracts to PCTs."

Mr Axon was critical of moves to refine control of entry criteria, saying: "Since PSNC negotiated the provisions there have been those within the contractor sector who have continually - for their own commercial gain - done everything possible either to undermine the regulations or bend them to their own purposes."

● The PSNC was due to have its first meeting with the NHS Executive on the pharmacy strategy this week.

Following the sudden death last week of Northern Ireland director of pharmaceutical services, CSA, Ronnie McMullan MBE FPSNI, we have received several tributes from friends and colleagues

Pharmaceutical Society of Northern Ireland:

On Sunday morning the world of pharmacy in Northern Ireland was rocked by the news of Ronnie McMullan's sudden death.

Ronnie had been participating at a weekend conference and team building exercise, run by the NI GHP group, on Lusty Beg island, Co Fermanagh, where, as ever Ronnie was enjoying himself and entering into the full spirit of things. It all came to an abrupt and untimely end while he was sitting and enjoying a drink and conversation with friends at the Saturday night social event.

Ronnie's name was synonymous with pharmacy, in all its facets, in Northern Ireland. During his time on the Council of the PSNI, he chaired many of the council committees. At the time of his death he was treasurer to the Society and chairman of the finance and house committee. He was elected a fellow of the Society in 1984 and was president in 1989/90.

The Society's Council will be the poorer for the loss of the wise counsel, depth of legal knowledge and general good humour with which he conducted himself. Ronnie was well known for his commitment to all things pharmacy and this was epitomised by his unstinting attendance at Council meetings and Society events.

Ronnie attended every BPC since 1976, including Birmingham 2000, and had been asked to address the joint conference of the PSNI and the Pharmaceutical Society of Ireland in Tullamore, Co Offaly, in October.

Over his long career in pharmacy Ronnie quietly supported and encouraged many pharmacists and, indeed, he would have been rightly proud and optimistic for the future of the profession if he had been able to witness the care, professionalism and teamwork shown by the pharmacists who tried to resuscitate him on early Sunday morning and who, even though they did not succeed, ensured that everything that could be done, was done.

It is a very sad thought that Ronnie was actually on countdown to his retirement early in 2001 and a lot of people were looking forward to celebrating this event with him.

Michael Guerin, chairman of the Pharmaceutical Contractors Committee:

My colleagues on the Pharmaceutical Contractors Committee have been shocked and very saddened by the news of Ronnie McMullan's death. Ronnie was a much loved, much admired and highly respected colleague and his premature passing leaves a huge void on the Council of the PSNI. He will be greatly missed by pharmaceutical contractors throughout the province, and by his colleagues at the Central Service Agency, where Ronnie worked as Director of Pharmaceutical services for so many years. His loss, however, will be felt most keenly by his family and close personal friends, and we offer them our most sincere sympathy.

Dr Norman Morrow, chief pharmaceutical officer, and Derek Baker, director of primary care, on behalf of colleagues in the Department of Health, Social Services and Public Safety, Belfast:

We were deeply saddened at the news of Ronnie McMullan's sudden death and share with others a profound sense of loss.

Ronnie made an immense contribution over many years to the formulation and implementation of pharmaceutical policy. Nothing was ever too much trouble for him. No matter how busy, he always found time to deal with requests for advice or information from the Department.

Ronnie never lost sight of the need to provide a good service to his customers, whether patients, pharmacists, or the Department. Speaking to Ronnie invariably brightened one's day. He touched many with his warm-heartedness, generosity, passion and enthusiasm for those things he believed. His vast knowledge, helpfulness and sense of humour will be sadly missed by all his colleagues and friends in the Department.

Treatment

ZOVIRAXTM
COLD SORE CREAM

Putting the smile back on your face

Presentation: 5% w/w aciclovir in water miscible cream base. **Uses:** Cold Sore treatment. **Dosage and Administration:** Apply 5 times a day for 5 days. It is important to start treatment as early as possible after the start of an infection, ideally during the tingle phase. If healing has not occurred, treatment may be continued for up to an additional 5 days. **Contra-indications, Warnings, etc:** Zovirax Cold Sore Cream is contra-indicated in patients known to be hypersensitive to aciclovir or propylene glycol. **Precautions:** Zovirax Cold Sore Cream should only be used on cold sores on the lips and face. Do not apply inside the mouth or in the eye. Do not use for herpes infections of the eye or the genital area. Do not use if the patient is under the care of a doctor because of a weak immune system. **Side and adverse effects:** Transient burning or stinging may follow application. Mild drying or flaking of the skin has occurred in about 5% of patients. Erythema, itching and contact dermatitis have been reported rarely following application. Retail Selling Price: 2g tube - £4.67 (exc VAT); 2g pump - £5.10 (exc VAT) **Product Licence Number:** PL 0003/0304 **Licence Holder:** The Wellcome Foundation Limited, Greenford, Middlesex UB6 0NN **Legal category:** P Further information available on request from: Customer Services, Glaxo Wellcome UK Limited, Stockley Park West, Uxbridge, Middlesex, UB11 1BT **Date of preparation:** May 1999 ZOVIRAX is a trademark of the GlaxoWellcome Group of Companies. © Glaxo Wellcome UK Ltd., 2000. Clocking up credits

Pharmacists seem to have got the message as far as display, corporate identity and the benefit of local sponsorship are concerned.

A poll among UniChem's Community Pharmacy Initiative (CPI) customers revealed that healthcare information leaflets topped the wish list of CPI pharmacists when they redeemed their marketing credits from UniChem.

Branded wall clocks, personalised staff badges and local sponsorship also made the wish list top ten.

Marketing credits are awarded by UniChem following a successful visit of a mystery customer to a CPI pharmacy, and can be redeemed for various marketing materials offered by UniChem.

IN BRIEF

Organon's 110 jobs in Scotland

Organon, the Dutch pharmaceutical company, has invested £10m in a new pharmacological research laboratory in Airdrie, Scotland. The expansion has been supported by Lacate in Scotland, the joint Scottish Executive/Scottish Enterprise inward investment agency. It is expected that 110 new jobs will be created in the next three years. Organon research focuses on treatments for schizophrenia and depression.

AZ/Scipher launch company

AstraZeneca (AZ) and Scipher are to launch a chemical-instrumentation company called SpectraProbe, as a result of an existing research collaboration. SpectraProbe will develop sensor-based process-monitoring instruments. AZ plans to test these in its manufacturing operations over the next two years. Scipher has transferred 23 patents to SpectraProbe.

Frances Charlesworth, Director of International and Commercial Affairs at the ABPI, has won the *Pharmaceutical Times* 'Industrial Achievement Award'. The 'Pharma', which is voted for by the directors of more than 30 pharmaceutical company's, recognises the person who in the judges' opinion achieved most in the pharmaceutical world in the year 1999/2000. Mrs Charlesworth is due to leave the APBI shortly to work for AstraZeneca

Deal ends Source uncertainty

National Data Corporation has acquired Source Dispenser and OTC Advisor, which package and sell wholesalers' sales data to manufacturers who want to know how well their products are selling in pharmacies and from dispensing doctors. The sum paid by NDC is undisclosed.

The deal ends a long period of uncertainty for Source. The company became a subsidiary of IMS Health when the group bought Source's parent, Pharmaceutical Marketing Services, in August 1998. But the Government ordered IMS to divest the Wholesale Sales Data Service business - which comprises Source Dispenser -

a year later; this followed advice from the Monopolies and Mergers Commission that the group had acquired a near-monopolistic grip of the pharmaceutical data services market.

IMS had originally been given until May 25, 1999, to divest the WSDS business, but finding a buyer clearly took much longer than anticipated.

Pharmaceutical manufacturers can now choose between two pharmaceutical data suppliers: NDC Health Information Service, through NDC Dispenser (formerly Source Dispenser), and Taylor Nelson Sofres Healthcare, through its 'transact' service. Both suppliers receive their data

mainly from the British Association of Pharmaceutical Wholesalers.

Chris Brooker, chairman of the BAPW's IT data-supply working party, said the onus was now on both companies to expand and improve their services to attract more manufacturer clients.

NDC Health Information Service's growing UK portfolio already includes the pharmacy software specialists Hadley Hutt, Chemtec and John Richardson Computers.

Nancy Briggs, NDC Health Information Service's managing director, said the acquisition confirmed its commitment to operating in the UK.

Boots denies rumours of merger with Sainsbury's

Boots the Chemists has denied reports in the *Sunday Telegraph* that it has been involved in merger talks with supermarket chain J Sainsbury's.

"We are not in merger talks with Sainsbury's and on top of that we have no plans to merge with anybody," a Boots spokesman said categorically.

He did, however, concede that Boots was routinely involved in discussions with other retailers.

The paper reported that the two retailers had agreed terms under which Sainsbury's would be responsible for the food and other peripheral ranges in Boots stores, while the high street chemist would run the health-care, toiletries and cosmetic section in Sainsbury's branches.

The *Sunday Telegraph* went on to claim that talks had broken down when the £12m deal was considered too complex and after Sainsbury's began to fear

it would be difficult to obtain alcohol licenses for the pharmacies.

The Boots spokesman also rejected claims that the company was planning to close or sell up to 250 of its 1,450 stores in order to concentrate on more profitable outlets and international expansion.

He said that Boots had started a review of its outlets and confirmed that the company might close up to a few dozen stores following the reviews' completion. He was adamant that closures would amount to nowhere near the figure given by the *Sunday Telegraph* and pointed out that Boots was preparing to open 30 stores in edge of town retail parks.

He added that 85 per cent of the 1,450 Boots stores were located in town centres and that, more importantly, 85 per cent of business in edge of town retail parks was new business, and not a detrimental to town-centre shopping.

Boots recently opened a store in an edge-of-town retail park in Cheltenham, and another is planned in Ipswich. Fifty-nine of the company's existing stores fall into the edge-of-town category.

Sainsbury's declined to comment.

APPOINTMENTS

UniChem has appointed **John Davidson** as the company's new director of management services. Reporting directly to UniChem's managing director Chris Etherington, Mr Davidson will be responsible for the wholesaler's IT systems and the strategic development of e-commerce throughout UniChem. Mr Davidson joins from contact lenses company Bausch & Lomb where he was IT director.

Moss Pharmacy has appointed a new managing director for Scholl Retail, the chiropody and footwear division it acquired from SSL International. In his new position, **Colin Campbell** will be responsible for strategic decisions and brand development, and have full operational control. Mr Campbell will be able to draw on his previous experience with various retailers, including Cadbury Schweppes, Sainsbury's and Clarks.

Numark has appointed **Stephen Marks** as its new finance director. Mr Marks takes over from Bernard Miller, who will be retiring this month. The new finance director joins Numark from the accountancy firm KPMG. The new manager for Numark's NHS business is Nin Sanghera. She is a qualified pharmacist and has worked for a number of large pharmacy retailers, including Boots, Lloyds and Superdrug.

Fuel crisis hits retail sales figures

The recent fuel crisis contributed to disappointing sales in September, according to the Confederation of British Industry, which recorded the slowest annual sales growth since May 1999.

Pharmacies performed roughly in line with the rest of the sector, a reported balance of plus 14 in terms of sales growth. This compares to a balance of plus 64 reported during the same period last year.

Solution Product Systems (SPS), the customer-tracking and behavioural ana-

lyst, said that during the week when the crisis was at its height customer traffic in high streets, shopping malls and out-of-town retail parks fell by 12 per cent.

Regional Shopping Centres such as Bluewater in Kent and Trafford Park in Manchester were hit very hard, SPS said, as customer traffic dropped by 27 per cent against the seasonal norm.

Retail analysts Verdict Research confirmed that their figures showed the crisis led to a 10 per cent fall in trade during that week.

Product licence holder: Procter & Gamble (Health & Beauty Care) Limited, The Heights, Brooklands, Weybridge, Surrey, KT13 0XP. **Legal category:** GSL. **Price (excluding VAT):** £1.89. **Date of preparation:** September 1999.

PIs hit UK industry

Half year figures released by the Association of the British pharmaceutical Industry (ABPI) this week showed a 58 per cent drop in the UK's trade balance with the rest of the European Union. The balance fell to £51m compared with £121m for the same period last year.

The industry association blamed a huge increase in the number of parallel imports for the drop in profitability; it says these now account for around 10 per cent of dispensed products and cost the industry up to £750m a year.

The ABPI's director, Trevor Jones, said: "The latest trade figures show how serious the problem is. The EU is our most important single market... the warning signals could not be stronger."

For the same period the trade balance for medicines in general has risen to £1.1 billion, an increase of 18 per cent.

Parallel imports is one of the issues the ABPI is raising with the Government as part of a joint project which is due to finish at the end of the year.

Celltech Chiroscience's new R&D centre at Granta Park in Cambridge was opened on October 4 by the Trade and Industry Secretary, Stephen Byers, MP. The £20m centre was a joint development between Celltech, the UK biotechnology group, and MEPC and houses 32 laboratories. It is expected that 250 staff will work at the 106,000ft² complex. Research at the centre will focus on the discovery and development of drugs for life-threatening disorders. Dr Peter Fellner, Celltech's chief executive officer (left), welcomes Stephen Byers

AU moves into Dutch wholesale market

Alliance UniChem (AU) has acquired Interpharm, the second largest wholesaler in the Netherlands, for £121.9m. The company has a 22 per cent share of the Dutch wholesale market.

The sum includes an initial cash consideration of £115.4m and an additional £6.4m to be paid by the end of 2001. AU will also assume Interpharm debt of up to £12.4m.

Increasing the geographical coverage of AU's healthcare activities was given as one of the main reasons behind the acquisition.

"This acquisition clearly fits into our strategy of building a leading position in the European healthcare market and gives us a significant presence in the Dutch pharmaceutical wholesale market," AU's chief executive officer, Jeff Harris, said.

When rumours of the acquisition first surfaced earlier this year, Mr Harris denied that AU had any direct interest in the Netherlands, but

refused to comment any further (C&D April 29).

Interpharm, the pharmaceutical and healthcare distribution division of Internatio Müller, delivers to over 500 retail pharmacies in Holland, including outlets of its own pharmacy chain, Kring apotheek.

AU first entered the Dutch retail pharmacy market in August this year with the acquisition of 14 pharmacies (C&D August 4). Adding the Kring pharmacy chain, which has about 200 outlets, will give AU a considerable presence in the Dutch retail market, on top of Interpharm's considerable wholesale preserve.

A spokeswoman for the company said that AU had identified a lot of attractive markets within Europe and the Netherlands was one of them. She added that the company was looking for further expansion in the Dutch market.

"Now that Alliance UniChem has a wholesale business as well as a retail

Jeff Harris: "Acquisition fits into our strategy"

chain, it is in a better position to look for opportunities," the spokeswoman said.

For the financial year ending December 31 1999, Interpharm recorded sales of £534.3m and operating profits of £16.2m.

AU hopes to be able to finance the deal largely through a placing of around 20m shares, at 507p each.

Pharmacists offered new way of networking

A former locum has set up a service that enables independent pharmacists to install a video/audio message on their web sites.

Laurence Middleton Jones, who also used to own a pharmacy, set up Actionstream Direct Media around three months ago. Its streaming video/audio service, he said, will enable pharmacists to project their personalities over the net, instead of only supplying pages of information.

Technology such as this, he claimed, would allow pharmacists to harness the power of the net, instead of viewing it with suspicion.

ADM commissioned a telephone survey of 400 pharmacists, which found that most believe the internet threatens their profession. Sixty-eight per cent of respondents, according to the survey, said the net would make pharmacy more impersonal, with customers ordering more products on-line and seeing less of their pharmacists.

For around £1,000, Mr Jones' team arranges a script with the pharmacist and the video shoot, which normally takes around half a day. After editing, a three-minute video message is produced and installed on the pharmacy web site.

Mr Jones said the customer would not have to wait a long time downloading the message because it is 'live'. "The

[video] file is compressed to the bandwidth the pharmacist's modem will allow and then it's played when the customer clicks on the file," he said.

He added that ADM, based in Hay-on-Wye, Hereford, used the same system as the on-line versions of BBC News and Channel 4's Big Brother programme. A streaming audio version, which also runs for three minutes, costs £500.

Pharmacists who want to use the service should ensure they are complying with the Royal Pharmaceutical Society's code of ethics. They are also advised to consult the RPSGB's professional standards section before they install the video messages.

ADM offers a nationwide service and recently received £150,000 from the Welsh Development Agency.

For more information, call ADM on: 01497 821460.

Boots clashes with FoE

Forty Boots stores across the country were targeted by protesters belonging to Friends of the Earth (FoE) last weekend. The environmental pressure group accuses Boots of not taking its responsibility as a health retailer seriously enough with regards to certain dangerous chemicals.

FoE is launching a campaign urging UK companies to stop selling chemicals that build up in the body, to only use the safest chemicals and to pledge not to use any chemicals which have not been properly tested in everyday products.

It says that increasingly research suggests that certain chemicals can be linked to hormone-related diseases such as testicular and prostate cancer, and the early onset of puberty in girls. According to the European Union only 14 per cent of chemicals used in great quantities have a set of minimum safety data.

FoE had previously written to 87 large companies, including pharmaceutical and health and beauty retailers, asking for their position on use of the chemicals, and subsequently listed them in three categories according to the actions taken by the company.

The chemicals in question are phthalates and alkylphenols, which are known hormone disrupters. Phthalates are routinely used in PVC products and

some cosmetics, while a lot of soaps and perfumes contain artificial musk, another of the chemicals listed.

While Superdrug fell into the green category, indicating that the company was either not using such chemicals or at the least was making serious efforts to try to phase them out, Boots was placed in the red category.

The company had stated in its reply that it complied with all regulatory requirements and any additional steps would be considered as and when the relevant bodies required them.

Mike Childs, safer chemicals campaigner at FoE, said that Boots was high up the list of companies the charity would be targeting.

"Especially for a retailer promoting itself on health and saying Boots is good for your health, trust Boots, they are not as true to their word as they could be," he said.

Responding to the protest, Boots said that the chemicals it used were safe and did not pose a risk to users. It added that the materials were under constant review and that if new information questioned their safety, the company would obviously seek alternatives.

Mr Childs argued that "in light of the discussions surrounding BSE and GM foods, people do expect more from their retailer".

SB to acquire Block Drug for £849m

SmithKline Beecham is acquiring US-based Block Drug, an oral healthcare specialist whose brands include Sensodyne toothpaste, for \$1.24 billion (£849 million).

Block Drug operates in 100 countries and reported profits of \$56.8 million on sales of \$864.3 million for the year to March. Oral healthcare products account for nearly three quarters of its sales, while OTC medicines make up the remainder.

SB has rejected suggestions that the deal is badly timed because it is still

waiting for US regulatory authorities to clear its merger with Glaxo Wellcome.

The acquisition is not expected to delay SB's merger with GW. SB denied press reports that the acquisition was designed to enhance its consumer products division, which would then be divested after the GW merger.

Although acquiring Block Drug will place SB among the top three oral healthcare companies internationally, the group does not expect the deal to fall foul of anti-monopoly authorities.

COMING EVENTS

OCTOBER 16

Slough Branch, RPSGB, Wexham Park Hospital, Slough, 7.15 for 8pm. 'Treatment of Heart Attacks' by Dr Richard Grocott-Mason, Cardiology Registrar, Hillingdon Hospital.

NEW PRODUCT ANNOUNCEMENT

Co-pharma Heel Balm

Unique Triple Action Treatment for Dry Cracked Heels

NOTICEABLE IMPROVEMENT WITHIN 7 DAYS

Dry cracked skin (xerosis) is a common condition involving the thickening and fissuring of the underneath and outer margins of the heels. The condition can also affect the soles of the feet, undersides of the toes, elbows and knees. In addition to being unsightly, if neglected, untreated cracks may deepen to the extent that the dermis layer of the skin is affected and may lead to painful and more serious problems, including infections

Co-pharma Heel Balm contains high strength Urea (25%) and Allantoin, powerful Keratin softening agents which work by chemically breaking down hard, thickened areas of skin, aiding its easy removal

Moisturisers penetrate deeply into dry skin to increase water uptake, allowing dry skin to be replaced by soft healthy skin.

Natural Peppermint Oil aids in leaving feet feeling fresh and cool. Will also help prevent blisters

Co-Pharma Heel Balm is now available from all wholesalers.

All because the lady loved chocolate oranges

Leicester pharmacist Terence Mattock, who has run a pharmacy on Fosse Way North for 40 years, will soon be rubbing shoulders, in literary terms, with the likes of Jilly Cooper, Tony Blair and Gary Lineker. Mr Mattock has won a local newspaper competition in the *Leicester Mercury* which asked him to describe 'The moment that changed my life'. He joins 50 celebrities whose entries will be published in a charity book to raise cash for Headway, the national charity which cares for people with brain injuries.

Mr Mattock wrote about how he proposed to his wife, Joyce, one Christmas morning, by hiding an engagement ring in a chocolate orange and watching, on tenterhooks, as she started eating the chocolate. Would Joyce swallow the ring? Worse still, what if she turned him down? Mr Mattock's words capture the moment:

"I sighed with relief as she paused mid-bite before extracting my solitaire diamond love token, then waited for her answer to my unspoken proposal. After an apparent eternity, she handed it to me, simultaneously proffering her hand for me to place it on her finger. Without a word being spoken, we were engaged, and that momentous occasion changed my life forever... It also represents the longest period of silence from my wife either before or after that decision."

Joyce and Terry Mattock – who will be celebrating 30 years together in November

Over 3,000 customers have now taken advantage of motor insurance offered by Pharmacy Mutual in partnership with Avon Insurance. Dawn Gallagher, the 3,000th customer and a pharmacist at Derbyshire Royal Infirmary, receives a money-off voucher for her next renewal from insurance adviser Beverley Patrick. Dawn commented that one of the reasons she chose the policy was because she would receive a courtesy car if hers were damaged in an accident. We know our Ed has found this facility useful – twice in fact!

APPOINTMENTS

Janice Perkins has been appointed business development manager for the United Norwest Co-op's northern area. She joins the company's healthcare division from Boots, where she was a professional development manager.

Dr John Levy has been appointed regulatory affairs manager for Unigreg Ltd.

Dr Tony Whitehead has joined the London-based biopharmaceutical company Antisoma as director of clinical development. He joins from Pfizer where he has been medical director since 1995.

Dame Margaret Seward has been appointed chief dental officer. She will succeed Robin Wild, who retires on November 1.

Janice Perkins

Whitehall Laboratories territory manager Gareth Hughes (right) hands over champagne to counter assistant Julie Hunt, the latest winner in the C&D Counterpart monthly draw. Julie works at the Greenstreet Pharmacy, Teynham, Sittingbourne, and has only been behind the counter for a year. Her supervising pharmacist, William Stevens, also collects a prize. Whitehall sponsors C&D's Counterpart Assistants Training Course

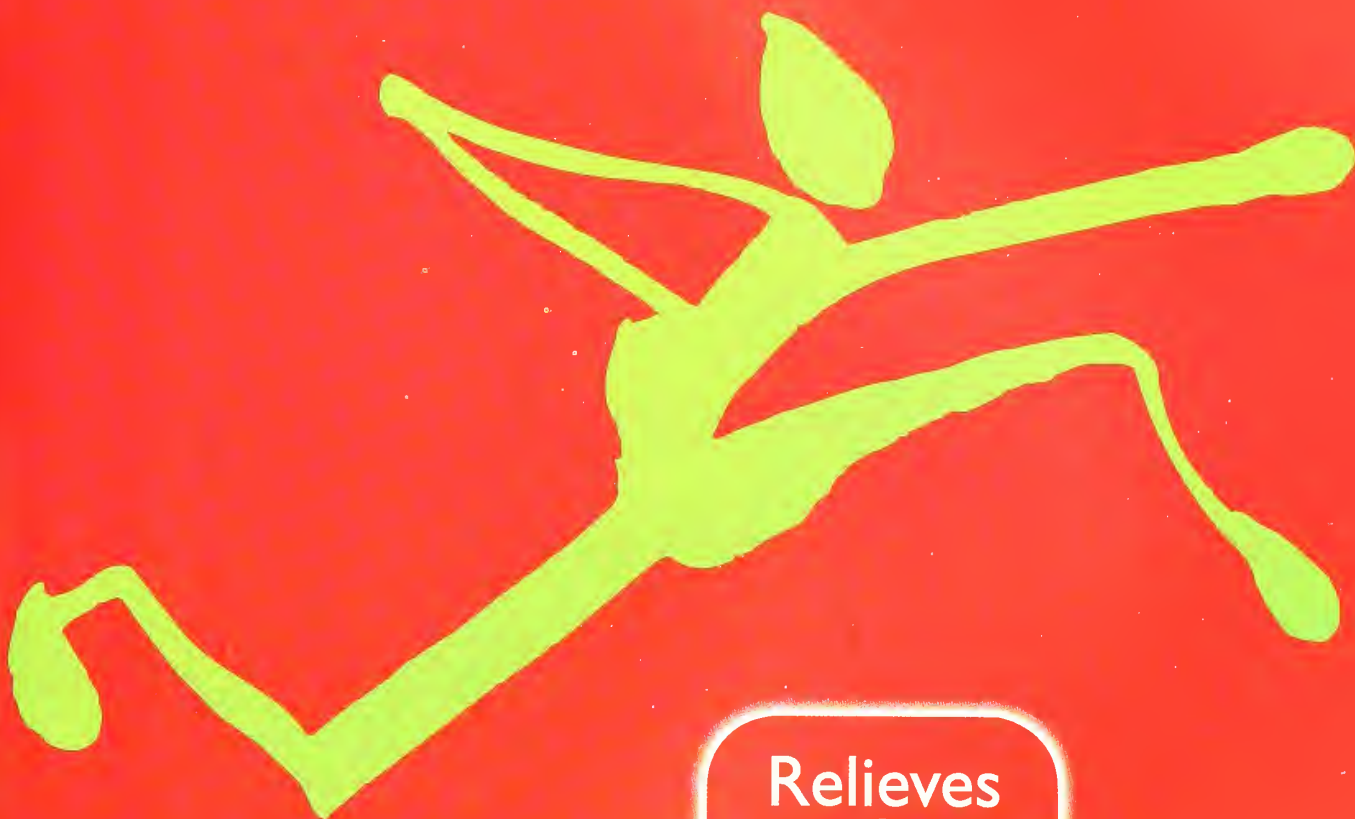

Mo Mowlam is well-known as a politician who boldly does what few others dare to do (American journalists will not have forgotten the occasion when she doffed her wig during a press briefing), but was she aware that she was being photographed while 'playing' on the Family Planning Association's stand at the Labour Party Conference? Yes, is the answer – and she also agreed to condom

supplier Condomi rushing out a conference postcard saying 'Stop New Labour?' Who says politicians can't have fun?

The second stage of the competition to find the Care pharmacy assistant of the year has been won by Parminder Singadia of Masters Pharmacy in Sparkhill, Birmingham. Mike Collins (right) of Thornton & Ross presented her with a leather briefcase, while pharmacist Jaffer Alibhai, who signed the winning entry, won a personal organiser

THE BEST SELLING TOPICAL PAINKILLER HAS JUST PUT ON EVEN MORE MUSCLE

ibuprofen

NEW IBULEVE MAXIMUM STRENGTH

For backache, rheumatic and muscular pain, sprains and strains
and pain relief in common arthritic conditions.

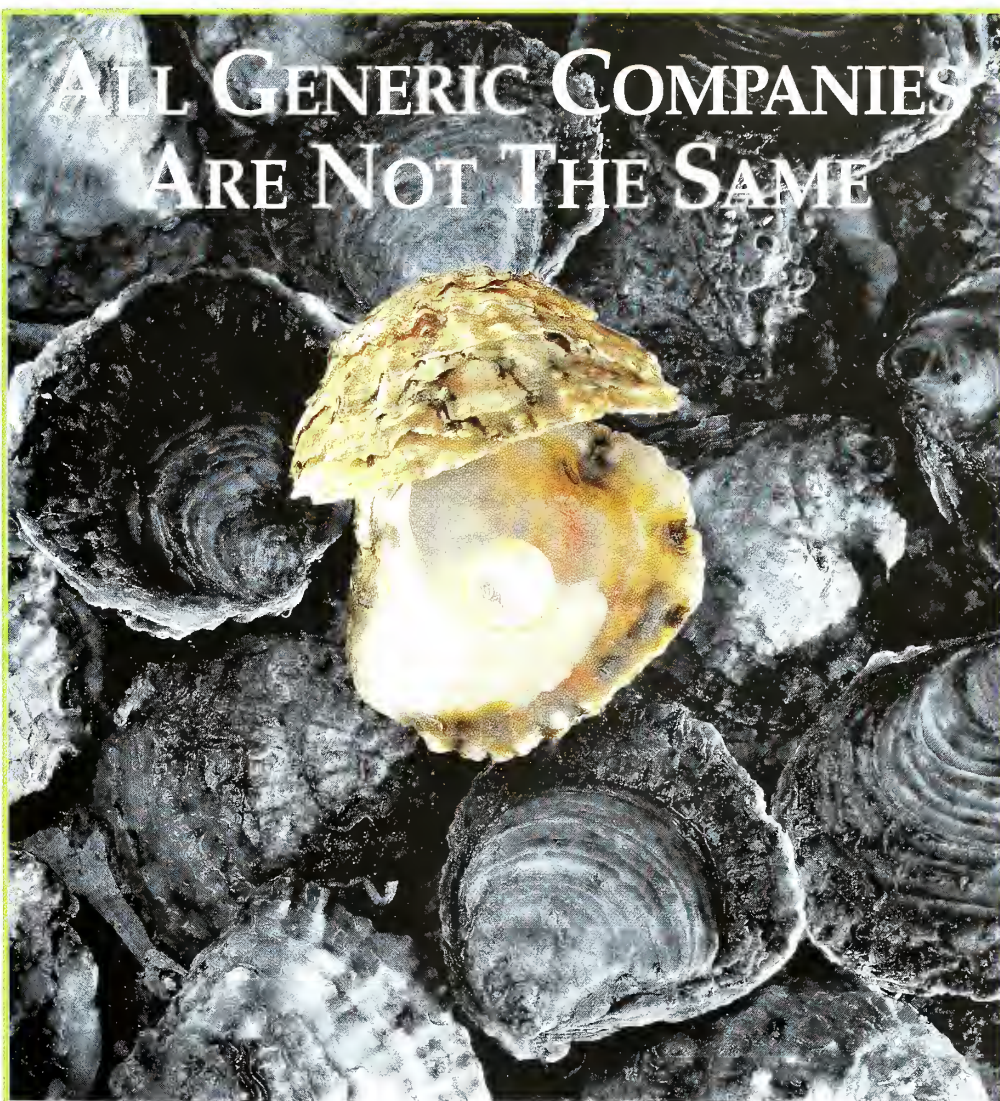

IBULEVE (Ibuprofen) and **Maximum Strength** are registered trademarks of **Diomed Developments Ltd**, 100, High Street, SG4 7QR, UK. (Distributed by) **DD** 0173 0114 Rillmansworth Road, Wyndford, Herts. WD18 8QZ, UK.
Directions: Apply a pl. 2 to 5 mm of gel (ibuprofen 125 mg) to the affected area. Massage gently until absorbed. Wash hands after use. Repeat as required up to three times daily.
Indications: For the relief of backache, rheumatic and muscular pain, sprains and strains. **Ibuleve Maximum Strength Gel** is also for pain relief in non-serious arthritic conditions.
Contra-indications: Not to be used if allergic to any of the ingredients, or in cases of hypersensitivity to aspirin, ibuprofen or related painkillers (including when taken by mouth), especially with asthma, with a history of asthma, rhinitis or urticaria. Not to be used on broken or damaged skin. Not to be used during pregnancy or lactation. **Precautions:** Not recommended for children under 12 years without medical advice. If symptoms persist, consult a doctor or pharmacist about continued treatment. Patients with asthma, an active peptic ulcer or a history of kidney problems should consult their doctor before use, as should patients already taking aspirin or other painkillers. Interactions with blood pressure lowering drugs may occur, but is very unlikely. Keep away from the eyes, nose and mouth. Keep all medicines out of the reach of children. **FOR EXTERNAL USE ONLY.** **Side-effects:** In normal use, side-effects are very rare, but could occasionally include allergic or allergic skin reactions in susceptible individuals. **Legal Category:** P. **Packs:** Tubes of 30 g. (PL 0173/D/16), RSP £4.95 (£4.21 exc. VAT).

ULTRAMOL Prescribing Information

Indication: For the relief of most painful and febrile conditions.

Presentation: Ultramol effervescent tablets.

Effervescent tablets each containing Paracetamol Ph.Eur. 500 mg, Codeine Phosphate Hemihydrate Ph.Eur. 8 mg and Caffeine 30 mg. Supplied in boxes of 60 tablets. Basic NHS cost of 60 tablets £2.69 PL 11723/0282

Dosage: For oral administration only. The effervescent tablets should be dissolved in at least half a tumblerful of water before ingestion. **Adults, including the elderly:** Two tablets not more frequently than every 4 hours. Maximum of 8 tablets per 24 hour period. **Children:** Not recommended for children under 12 years. **Contra-**

Indications: Hypersensitivity to paracetamol, codeine or caffeine. **Warnings:** Special care should be observed in any patients with severe renal or hepatic impairment. Excessive intake of tea, coffee or cola with these tablets may make patients tense and irritable. Nursing mothers should also be advised to avoid these beverages as irritability and poor sleeping patterns have been observed in breast-fed infants. Each tablet contains 362 mg sodium. This should be taken into account in patients requiring sodium restriction. **Interactions:** With domperidone, metoclopramide, cholestyramine and warfarin (and other coumarins), interactions may occur. **Side-effects:** Adverse effects to paracetamol are rare, but hypersensitivity and blood dyscrasias have been reported. Codeine can cause opioid effects, e.g. constipation, nausea, vomiting, dizziness, light headedness, confusion, drowsiness, urinary retention. Frequency and severity depend upon dose and duration of therapy and patient susceptibility. Tolerance and dependence can occur, especially with prolonged high dosage of codeine. Caffeine may produce headache, tremor, nervousness, irritability, sleeplessness, palpitations and GI tract irritation. Legal Category: F

Who makes what: a unique source list

This C&D Generics Supplement not only lists the seven-digit PIP Codes, but also provides buyers with a unique source list for unbranded lines in pack sizes ranging from counter and dispensary to small-scale manufacture.

The list is arranged so that users can trace alternative suppliers easily, and at the same time have the relevant PIP Code for ordering and product identification. Entries are updated in the weekly Price List Supplement when changes are notified to C&D by manufacturers. C&D would be pleased to receive details in writing, of any packs not currently listed and for which codes are required.

As far as possible, the following compilation rules have been observed:

1. When the PIP code was converted from six to seven digits, a zero was placed before the old number, so retaining the existing check digit.

2. New PIP Codes are allocated randomly as under the six figure system and start with "1".

3. In the interest of continuity, priority in re-allocation of existing codes has been given to suppliers whose products carry the PIP Code on their packs.

4. Entries are generally under pharmaceutical name in order to bring all suppliers together for maximum buyer choice. However, counter packs will often be labelled with a popular synonym (eg Gee's linctus, Whitfields ointment). A cross-reference has been provided whenever products are shown under a synonym in suppliers' lists.

5. The "DT" symbol indicates Drug Tariff pack sizes.

The PIP Code

History

The benefits of a common code for pharmacy products have been long recognised, and over the years various working parties recommended the creation of such a code. In 1982 the National Pharmaceutical Association, in conjunction with Benn Publications (publishers of *Chemist & Druggist*), created the PIP Code in which they now hold joint copyright. This move had the support of several major pharmaceutical wholesalers.

Definition

The PIP Code is a product identifying number which has been allocated to goods distributed through pharmacies. All types of products are included and every pack size and colour or other variation has its own unique PIP Code number. The codes are published alongside each product entry in the *Chemist & Druggist* monthly Price List and weekly supplements, ensuring that a readily accessible and up to date PIP Code reference is widely circulated.

Initially, a six-digit code was chosen for ease of keyboard entry, but demand for the PIP coding system has necessitated the introduction of a seven-digit code. The last of these digits is a check digit (see p5) to minimise errors in recording.

Uses

The individual computer systems operated by manufacturers, wholesalers and retailers can be interfaced to recognise the PIP Code, which therefore provides a common language. This enables the retailer to

retain a freedom of choice of supplier and makes it possible for all involved in the distribution chain to benefit from streamlining their communications and merchandise handling systems.

Initially the PIP Code was used mainly as an interface between retailer and supplier for the purpose of placing and receiving orders, and virtually all pharmaceutical wholesalers can now recognise PIP Code when transmitted electronically. However, within retail pharmacy it is used increasingly for stock control and point-of-sale data capture. Most computer bureaux handle PIP Code data for clients, and many EPoS and dispensary systems make use of the PIP Code facility.

Computer users who choose to adopt the PIP Code as the primary code for their systems can avoid the time and expense of maintaining their own database. This is a considerable advantage to smaller businesses and pharmacies which have only limited clerical resources.

Developments

Requests for further information on the Code's use, and licence applications etc, should be addressed to:

Mr Richard Maw
PIP Code Administrator
National Pharmaceutical Association
Mallinson House
40-42 St. Peter's Street
St. Albans
Herts AL1 3NP
Tel: 01727 832161

PIP Code principles

The Pharmaceutical Interface Products Code Regulatory Authority is the National Pharmaceutical Association, which takes advice from a technical panel representing retail and wholesale PIP Code users, plus *Chemist & Druggist* (who maintain the NPA's master PIP Code file).

The code is based on computer codes used to maintain the C&D Price Service but has been augmented to incorporate a number of product categories not considered appropriate for publication in the C&D monthly Price List (such as some watches, confectionery, stationery).

Code users may find the following points of policy helpful:

General

1. Manufacturer and distributor codes are published in Section 2 of the C&D monthly Price List.
2. Within the seven-digit PIP Code, codes have been reserved for users' own requirements (see para 12), but some wholesalers have allocated part of the series to "service" items such as bags and bottles. Retailers should obtain details of such allocation from their usual suppliers before using this series as dump codes etc.
3. Discontinued items are deleted from the C&D Price List upon notification by the manufacturer but remain on the master file for reference. If a product is re-marketed by the same supplier within that period, every effort is made to use its former code.
4. Where there are minor adjustments to pack sizes the existing code is generally retained to help retailers monitor sales performance. When the trade unit alters there is no requirement to issue new codes.
5. Both branded and generic product codes can be issued in advance of product launch with full security and confidentiality. The allocated numbers are reserved on the C&D computer pending advice of launch. Manufacturers of ethicals are particularly asked to use this facility so that codes can be notified on their standard letter to wholesalers. Intercontinental Medical Statistics (IMS) and *Chemist & Druggist* have available a joint form (approved by ABPI and BAPW) for prior allocation of both SDA and PIP codes.

Variants

6. Products which have no variants (colour, flavour, etc.) are identified by a separate "main" code for each pack size, representing singles wherever possible. This code appears immediately before the trade price column in the C&D Price List.
7. Where products include variants the "main" code does not appear - instead there are individual codes in italic type beneath the entry. However, the "main" code is allocated to a variant (e.g. neutral, normal, white, original, small etc) in order to reduce confusion for code users.
8. Where variants are added to an existing range the "main" code will normally be retained as the variant code for the original version. If this variant is subsequently discontinued its code will remain the "main" code but will no longer be published.

Special cases

9. PIP codes for unbranded products are shown in the C&D Generics Reference Book, distributed free to all C&D subscribers, additional copies are available on request. This supplement also lists wholesalers accepting PIP Code for ordering purposes, Generic Suppliers and Disallowed Dressings and Appliances section.

Note: Branded generics (ie, where a prescription calling for the brand name alone is sufficient to identify absolutely the product required) are to be found in the C&D Monthly P. L.

012-2156
PIPCODE
012-3456

10. Certain surgical/sundries groupings are at present not fully covered by PIP Code. This applies particularly to products where the multitude of size and type variations is great and/or product developments are frequent, so that retailers are likely to rely on manufacturers' product number or full description for ordering from a wholesaler. However, some of the more standard and frequently prescribed brands and generic items (eg many NHS appliances) are coded in the C&D Price List and the Generics Supplement. With the introduction of a seven-digit PIP Code the product areas covered by PIP Code will be extended as soon as possible.

11. Products normally restricted to hospitals are indicated in the Price List with HP. Products are coded if manufacturers anticipate them being prescribed to out-patients.

12. Promotional, temporary and seasonal packs are not coded; retailers should use the 900-0000 series, and wholesalers use the 800-0000 & 700-0000 series.

Coding queries

Coding queries related to products published or to be published in the C&D Price List and Generics Reference Book should be addressed to Colin Simpson, Price List Controller, Chemist & Druggist, United Business Media, Sovereign Way, Tonbridge, Kent TN9 1RW (telephone 01732 377407).

Queries relating to codes held on the master file should also be addressed to Colin Simpson at the above address.

Matter of policy should be referred to Mr Richard Maw, PIP Code Administrator, National Pharmaceutical Association, Mallinson House, 40-42 St. Peters Street St. Albans Herts AL1 3NP (telephone 01727 832161) from whom, for NPA members printouts of the master file in alphabetical or numerical order may be purchased. Non-members can apply to C&D direct.

The PIP Code copyright is owned by United Business Media (publishers of *Chemist & Druggist*) and the National Pharmaceutical Association is the licensed administrator.

Technical panel

The PIP Code technical/consultative panel, set-up by the National Pharmaceutical Association to advise it on code maintenance and development, is chaired by Mr Richard Maw of NPA and has the following members: Sonia Garner (NPA information department), Brian Hopkins (a community pharmacist), Colin Simpson (C&D Price List Controller, responsible for maintaining the PIP Code master file, the issuing of PIP Codes and their publication through C&D Price Services), Patrick Grice (Editor of *Chemist & Druggist* magazine), Andy Charlesworth (representing Numark Ltd), Phil Dodd (representing Gehe UK), Richard Kirby (representing UniChem plc), David Houghton (hospital representative)

Check-digit calculation

The check (seventh) digit of the PIP Code is arrived at by the following calculation:

1. Take each digit starting with units position then tens position and so forth and multiply by 1,2,1,2,1,2, etc.
2. Add up resultants of 1. (Add the digits not the products ie if resultant is two digits then add them together).
3. Subtract the figure at 2 from the next highest multiple of 10.
4. Answer is the modulus 10 check digit. If no remainder then check digit is zero.

To check

1. Take each digit (including check digit) and multiply by 1,2,1,2,1,2 (starting in units position).
2. Total resultants as before.
3. Answer should be an exact multiple of 10.

Example

$$\begin{array}{rcl}
 & 3 & 5 & 8 & 9 & 2 & 5 & \text{(original number)} \\
 \times & 1 & 2 & 1 & 2 & 1 & 2 & \text{(multipliers)} \\
 \hline
 = & 3 & 10 & 8 & 18 & 2 & 10 & \text{(resultants)} \\
 = & 24 & & & & & & \text{(sum of digits)} \\
 & & 3 & + & 1 & + & 0 & + & 8 & + & 1 & + & 8 & + & 2 & + & 1 & + & 0 \\
 & 30 & - & 24 & & & & \text{(subtract from next multiple of 10)} \\
 = & 6 & & & & & & \text{(this result is the modulus 10 check digit)}
 \end{array}$$

Check

$$\begin{array}{rcl}
 & 3 & 5 & 8 & 9 & 2 & 5 & 6 & \text{(PIP code number)} \\
 \times & 1 & 2 & 1 & 2 & 1 & 2 & 1 & \text{(multipliers)} \\
 \hline
 = & 3 & 10 & 8 & 18 & 2 & 10 & 6 & \text{(resultants)} \\
 = & 30 & & & & & & & \text{(sum of digits)} \\
 = & 0 & & & & & & & \text{(correct - exact multiple of 10)}
 \end{array}$$

IN THIS ISSUE you will see that at the beginning of some of the generic entries there is a further list of names in bold capital letters.

This is the names of the brands which contain the single generic ingredient under which they are listed. This information to the Generics Reference Book is to allow for easy cross referencing with branded equivalents in the main C&D Price List.

Amiodarone Hydrochloride (Sterwin Medicines)

tablets blister 100mg	28	104-2266	DT
tablets blister 200mg	28	104-2274	DT

Amitriptyline (see LENTIZOL)

Amitriptyline (Approved Prescript. Service)

tablets 10mg	28	108-1439	DT
tablets 25mg	28	108-1447	DT
tablets 50mg	28	108-1454	DT

Amitriptyline (Cox Pharms)

tablets 10mg f/c	28	108-1660	DT
tablets 25mg f/c	28	108-1678	DT
tablets 50mg f/c	28	108-2635	DT

Amitriptyline (Hillcross Pharms)

tablets 10mg	28	108-9903	DT
	500	102-7739	
tablets 25mg	28	108-3922	DT

Erythromycin (see ERYACNE 2, ERYACNE 4, ERYMAX, ERYTHROCIN, ERYTHROCIN 500, ERYTHROCIN IV, ERYTHROCIN STEARATE, ERYTHROPEP, ERYTHROPEP A, RETCIN, ROMMIX 125, ROMMIX 250, STIEMYCIN, TILORYTH)

IN THIS ISSUE you will see that at the beginning of some of the generic entries there is a further list of names in bold capital letters.

This gives the names of the brands which contain the single generic ingredient under which they are listed.

This information to the Generics Reference Book is to allow for easy cross referencing with branded equivalents in the main C&D Price List.

Erythromycin (Abbott)

tablets 250mg		
100	009-0233	DT
500	009-0241	DT

Erythromycin (Approved Prescript. Service)

250g	103-9163	
------	----------	--

IN THIS ISSUE . . . you will see that at the beginning of some of the generic entries there is a further list of names in bold capital letters.

This gives the names of the brands which contain the single generic ingredient under which they are listed.

This information to the Generics Reference Book is to allow for easy cross referencing with branded equivalents in the main C&D Price List.

S**Saccharin (ASPAR Pharms)**

DISALLOWED DRESSINGS AND APPLIANCES

A guide to both proprietary and non-proprietary items for which payment will not be made if dispensed against NHS prescriptions issued in England and Wales. Derived from the lists used by the PSNC Prescription Research Centre it includes extensive cross-referencing for quick access to particular products.

THE ABILITY TO LISTEN

IT'S ONE OF OUR BEST FEATURES

By working in partnership with pharmacists, APS Berk has become one of the UK's leading generic suppliers. This relationship has aided APS Berk in ensuring that we are the first major generic manufacturer to have a full product range in packs that are compliant to the leaflet and label legislation.

The APS Berk Patient Pack Programme supports this compliance and offers information on our product range, distribution, and services to assist you through the changes in the legislation and the challenges you come across.

You can take full advantage of our Programme by phoning us on **01132 380099**. Alternatively, visit us on our Website at **www.aps-berk.com**.

When you've seen and heard all the ways in which we can help you, you'll see why our ability to listen to what you want is so attractive. So do call us. We look forward to hearing from you.

WE LISTEN. WE MAKE IT HAPPEN

APS Berk is a member of the TEVA International Group of Companies
